AGENDA ITEM: 3

ITEM IDENTIFICATION:

UTSC Proposed Operating Budget: Themes and Priorities

JURISDICTIONAL INFORMATION:

Under section 5.7 of the Terms of Reference for the University of Toronto Scarborough Campus Affairs Committee “the annual budget is considered by the Committee for recommendation to the UTSC Council for inclusion in the University’s annual operating budget”. Appendix A of the Terms notes that this responsibility is executed as part of the campus’ budget planning process.

GOVERNANCE PATH:

1. UTSC Campus Affairs Committee [For Information] (November 11, 2014)
2. UTSC Campus Council [For Information] (December 3, 2014)

PREVIOUS ACTION TAKEN:

At the September 16th meeting of the UTSC Campus Council the Vice-President, University Operations and the Chief Administrative Officer (CAO) of UTSC provided an integrated budget presentation to the Committee based on current-year campus and institutional operating budgets. This presentation was part of the orientation and education for members. On October 15th the CAO made a similar presentation to the UTSC Campus Council.

HIGHLIGHTS:

In this general and high-level overview of the proposed campus operating budget, the Committee is being asked to consider for information and advice, the overall goals for the budget with reference
to the campus’s Academic Plans and other relevant planning information. The presentation is intended to explore the principles on which decisions are made, and the proposed uses of the resources available to the campus. Discussions at the UTSC Campus Affairs Committee and UTSC Campus Council will inform the campus’s annual budget discussions with the Provost in the fall to consider the budget submission. The University’s Operating Budget – incorporating the UTSC campus operating budget envelopes – will enter governance at the Planning and Budget Committee and move through the Academic and Business Boards prior to approval by the Governing Council. During this period, the Vice-President, University Operations will make presentations for information at the UTSC Campus Affairs Committee and UTSC Campus Council meetings in March and April, respectively.

FINANCIAL IMPLICATIONS:

UTSC Academic Budget Review
2015-16 to 2019-20

November 11, 2014
Introduction

The University of Toronto Scarborough (UTSC) is poised at a new threshold. Substantial growth in the campus population and the built environment over the past 15 years has transformed UTSC from an undergraduate satellite campus of the University of Toronto into a midsized university campus with a comprehensive research-intensive program. UTSC has expanded into new fields of teaching, research, and graduate education, which have furthered the campus as a dynamic center for learning and discovery for decades to come. Over the last 40 years UTSC has been the region’s leader in university based co-op education, providing tremendously valuable hands-on opportunities for students to translate the high quality classroom experience into real world applications. An anchor institution in the Eastern GTA, UTSC combines the intimacy of a close-knit campus, the breadth of the liberal arts and sciences, and the depth and rigor of one of the world’s best research universities. The campus provides exceptionally innovative, relevant, student-supported undergraduate education that speaks to the needs of the 21st century.

Fostering a vibrant culture of community engagement, UTSC students cross academic, geographic, and cultural boundaries in their pursuit of knowledge. The dynamic campus life features more than 150 student groups. Located next to popular natural landmarks in Toronto’s greenest area, UTSC is situated in one of Toronto’s most diverse and multicultural neighbourhoods.

New buildings by award-winning architects characterize UTSC’s transformational growth. UTSC has attracted over $500 million in capital investment on infrastructure since the last decade, shaped by a new campus master plan that sets out infrastructure growth for a cohesive, fully integrated framework throughout UTSC’s 300+ acre campus. These investments have included core academic infrastructure, student support areas and ancillary operations.

One of the most critical investments for the future of the campus has been removal and restoration of the former Morningside Landfill site (through partnerships with the City, and the Province), which has now unlocked the entirety of the 125-acre UTSC north campus. This land restoration has allowed UTSC to build:

- The Instructional Centre (2011), which is now home to our Management and Computer Science & Mathematics departments, houses our Co-op programs and provides 17 new state-of-the-art classrooms and teaching labs.
- The Toronto Pan Am Sports Centre (TPASC), one of the very best athletics facilities anywhere in the world. The facility has already attracted Canadian athletes back from elite American schools to both train and learn at UTSC.
• The new **Environmental Science and Chemistry Building**, which will open its doors in September 2015, providing some of the most sophisticated research and teaching labs anywhere in the world.

Recently, UTSC submitted a proposal for the provincial government major capital expansion program for two new infrastructure projects: Highland Hall (built on this site of the now vacant UTSC athletic centre) and a second phase of the Instructional Centre (IC-2). Funding announcements for successful proposals will likely be made in the coming months.

In addition to these large capital projects, over the past decade, UTSC has invested more than $30 million from internal sources, to undertake renovation projects to upgrade existing teaching and research facilities on the campus, and to build core infrastructure to support key ancillary operations. This new infrastructure includes parking, food services, and a student residence. It also supports expanded transit services that have made UTSC a regional transit interface.

Paired with these infrastructure projects, UTSC has made significant investments in building academic capacity through the recruitment of full-time faculty. The campus faculty complement now exceeds 330 FTEs across 15 academic departments. Many of the faculty have chosen to come to the University of Toronto generally, and the UTSC campus in particular, because of the strength and reputation of the University, and the existing complement on the campus. These faculty members have brought with them their research enterprise, and attracted graduate students, thereby further enriching the intellectual community at UTSC. The expanded research output of our community is making a significant impact locally, nationally, and globally. Further, expansion of our faculty has allowed UTSC to develop new graduate and undergraduate programs in areas that are in high demand, positioning the campus as a destination of choice for students.
Academic Considerations

Today, UTSC offers over 160 undergraduate programs in the arts, sciences and management through 15 academic units:

- Anthropology
- Arts, Culture and Media
- Biological Sciences
- Computer & Mathematical Sciences
- Critical Development Studies
- English
- French and Linguistics
- Historical and Cultural Studies
- Human Geography
- Management
- Philosophy
- Physical & Environmental Sciences
- Political Science
- Psychology
- Sociology

Enrolment

For the past decade UTSC campus enrolment has grown dramatically from 8,761 in 2004-05 to 11,703 in 2013-14 and will continue on this trajectory towards a planned steady state of 13,800 undergraduates and 390 graduate students by 2018-19. The early years of this growth took place during a period of healthy increases in university admissions applications across the province but for the first time in over a decade Ontario saw a decline of such applications for admission in 2014. Based on demographic trends in the traditional university-age provincial applicant pool this trend is projected to continue into the near future. We plan to meet our ambitious growth targets in spite of this by continuing an increasingly aggressive and sophisticated recruitment strategy and by increasing the international proportion of admitted students in the near term. This latter group has increased from 14.6% in 2012-13 to 17% in 2013-14 to 18.5% going forward from 2014-15 and up to 20% by 2019-20.

While some of our most popular programs, notably those in Management, Computer Science and Psychology, are currently operating at or even beyond capacity, we are confident of our ability to meet our growth goals by enrolling more students in the new and expanding programs described below as well as others among our longstanding programs.

New and Expanding Graduate and Undergraduate Programs

Human Health:

There is a great interest among students at UTSC in programs in the area of human health, as well as a growing societal need to better understand the complex issues surrounding human health. In response to this interest and need, UTSC has been developing a broad suite of health-related programs that take full advantage of our strong ties and collaborations with the many units of the University that are part of the health sector in the Toronto area. Recent initiatives in this area include an extensive redesign of the Major programs in Health Studies in 2013-14 as distinct BA and BSc programs, as well as a new Major
program in Molecular Biology, Immunology and Disease, and new Master’s and doctoral programs in the field of Clinical Psychology in 2013-14. While the initial impact of the redesign of the Health Studies majors saw a decline in enrolment from a total of 631 in 2012-13 to 601 in 2013-14, as of late October 2014 this has rebounded to 676. The new major in Molecular Biology, Immunology and Disease has attracted 73 students in its first year in operation. The new Master’s in Clinical Psychology has 10 students enrolled.

An initiative that has been approved this term is the Combined Degree program in Mental Health Studies (BSc) with the Master’s of Social Work (Factor-Inwentash Faculty of Social Work). This new program is ideal for students pursuing a career as a social worker. It provides a rich intellectual pathway for exceptional undergraduate students by giving them access to social work research before the completion of their undergraduate degree, and allowing them to apply early to the tri-campus Master’s of Social Work program. Initiatives still in the early stages of exploration include Advanced Care Paramedicine, Global Health, Wellness, and Health Management.

The Environment:

Qualified environmental scientists are in demand around the world, and UTSC has responded to this demand by further expanding its offerings in the area of environmental science. New initiatives include new streams in the highly successful Professional Master’s in Environmental Science, both of which take advantage of existing faculty expertise. The new field in Climate Change Impact Assessment addresses the growing societal need for science-based, policy relevant expertise in assessing the impacts of climate change. This field responds to growing career opportunities at all levels of government and in the consulting sector. The new interdisciplinary field in Conservation and Biodiversity emphasizes emerging issues in conservation and biodiversity. Its primary aim is to train professionals in the application of ecological theory and principles to real-world conservation challenges. This field responds to growing career opportunities in the green and sustainability sectors. Enrolment in programs in Environmental Science has grown from 301 in 2009-10 to 434 in 2014-15 and by all accounts the new Combined Program linking the BSc Specialist programs in Environmental Science with the Professional Master of Engineering (described below) is attracting very strong interest among prospective applicants.

Economics and Management:

Interest in economics and management continues to grow at UTSC. Recent initiatives include the Entrepreneurship stream of the Specialist in Strategic Management (BBA). A new initiative that is in the early stages of development is the Master’s in Behavioural and Management Research. This two-year, research-based Master of Science program will take advantage of existing faculty research and teaching expertise in the Department of Management, and focus on the fast-growing field of behavioural science in Management. At the forefront of cutting edge research and education, the program will give students an opportunity to pursue management education in behavioural research, and provide a bridge for
students considering pursuing a PhD in Management. Other initiatives that are at a more nascent stage include a stand-alone, campus-wide undergraduate program in Economics, and a Professional Master’s program in Accounting, which seeks to take advantage of a change in the regulatory regime in the province of Ontario.

Language, Communication and Media:

Student interest in the areas of language, communication and media continues to grow at UTSC. Recent initiatives include freestanding Minor programs in Creative Writing, and English to Chinese Translation. The Minor in English to Chinese Translation will benefit from funding raised in China for China studies on our campus, as well as visiting professors from North West University in Xi’an. The Minor in English to Chinese Translation has attracted 31 students in its initial year. While the Minor in Creative Writing has not yet enjoyed this level of program enrolment success, very strong course enrolments at the first and second year level, and the involvement of some very high profile faculty demonstrate future promise for this program. New initiatives at the very early stages of development include a Major in Creative Writing, and Major and Minor programs in Journalism. Each of these initiatives responds directly to student demand. Journalism in particular represents a growth area at UTSC given that the existing Specialist in Journalism (Joint with Centennial College) is experiencing steady growth, from 118 in 2009-10 to 158 in 2014-15, whereas Journalism programs in other institutions are in decline.

Peoples, Societies and Governance:

Understanding how we view individuals, society and the world is at the heart of much of our academic endeavors at UTSC. The social sciences at UTSC are responding to this wider interest by developing Minor programs designed in part to test the strength of student interest, with the intention of developing Major programs where interest is strong. A recently approved program that fits this model is the Minor in Public Law, which was first offered this year. The program addresses how the legal system governs the relationship both among constituent units of the state, and between citizens and the state. Already it is a very successful program, with over 150 students enrolled. Other programs currently in development, all of which respond to student demand and take advantage of existing faculty research and teaching expertise, include a freestanding Minor in Urban Public Policy and Governance, which focuses on the distinctive policy challenges and opportunities posed by cities; a freestanding Minor in Culture, Creativity and Cities, which focuses on how, and with what consequences, cities are changing; and a freestanding Minor in Migration and Ethnic Diversity, which focuses on the cultural, demographic and political causes and consequences of migration. Other initiatives, still in the early stages, are undergraduate and graduate Food Studies programs being developed in concert with the larger Culinaria research project. These exciting new programs in Food Studies are notable for their reach into Historical and Cultural Studies, Social Sciences, and Sciences, and will link to partner programs at institutions such as NYU and the National University of Singapore.
Applied Knowledge:

The ability to analyze and comprehend complex data is increasingly necessary for many of the careers our students wish to pursue. Recently, UTSC has responded to this demand through the creation of Minor programs with an applied knowledge focus designed to provide students with the fundamental training they will need to excel in their chosen field. Two new programs in this area are a Minor in Applied Statistics and a Minor in Geographic Information Science (GIS). The Minor in Applied Statistics attracted 38 students in its first year, 2013-14; this figure has nearly doubled to 74 in 2014-15. GIS has enrolled 15 students in its first year, 2014-15, and based on strong course enrolments, we fully expect enrolment in this program to grow exponentially in the coming years. It provides solid training in the use of GIS for spatial analysis, spatial data management, cartographic representation, and research methodology theory. We believe that these Minor programs in applied knowledge will be excellent companions to a wide variety of our other theoretical programs.

Combined Degree Programs

UTSC places a high value on its position within the larger University of Toronto organization and has been actively seeking ways in which to expand or strengthen our relationships with other divisions. An excellent example of our commitment is our pioneering efforts to develop close links between our undergraduate programs with graduate programs offered by other divisions. The new Combined Degree program linking the BSc Specialist programs in Environmental Science with the Professional Master of Engineering was the first of its kind within U of T, and paved the way for other Combined Degree program proposals from other divisions. Other Combined Degree program initiatives at UTSC include the recently approved BSc Specialist in Mental Health Studies with the Master of Social Work discussed above. Initiatives still in development include a Combined Degree program in Health Studies – Population Health (BSc) and the Master of Science offered by the Graduate Department of Rehabilitation Science, and a Combined Degree program in Linguistics/Psycholinguistics (BSc) with the Master’s in Speech Language Pathology. Also in development are Combined Degree programs with the BA in French or BSc in Mathematics and the Master of Teaching offered by OISE, which will replace the recently closed Concurrent Teacher Education Program (CTEP).

Our recruitment team already is highlighting this suite of programs in meetings and presentations with prospective applicants, and report very strong interest among these students and their influencers. We are optimistic about the strong positive impact these programs will have both in meeting student interests and needs, and in meeting our ambitious admission targets, particularly for strong students.

Inter-divisional Teaching

Another way in which we are leveraging our relationship with the wider University is through participation in inter-divisional teaching opportunities. We currently offer six courses through this....
program. These include: CHMB62H3 (Introduction to Biochemistry), which provides necessary curriculum for accreditation in various careers in Chemistry; EESCO04H3 (Biodiversity and Biogeography), which provides core curriculum in environmental science programs; PLICS4H3 (Speech Physiology and Speech Disorders in Children) and PLIDS6H3 (Special Topics in Language Disorders in Children), which are designed to prepare students for graduate work in Speech Language Pathology; PSYC68H3 (Diseases of the Brain and Mind: A Clinical Perspective), which offers students in Psychology, Mental Health Studies and Neuroscience programs access to research scientists from cutting edge institutions; and PSYD37H3 (Social Context of Mental Health and Illness), which provides students in the Combined Degree program in Mental Health Studies (BSc)/MSW a unique intellectual bridge to the Master’s program.

Curricular Renewal

UTSC has experienced significant and meaningful change in the last five years that has had an overwhelmingly positive impact on the academic life of the campus. Departmentalization, academic planning, response to the University of Toronto Quality Assurance Process (UTQAP, 2012), growth in faculty complement, and growth in student enrolment are all important drivers of this change. The Department of Social Sciences departmentalized in July 2012, forming the four new Departments of Anthropology, Human Geography, Political Science and Sociology, as well as the Centre for Critical Development Studies, and each of these academic units has recently undergone external review of its undergraduate programs. In addition, UTSC’s three Joint programs with Centennial College – Specialist in Journalism (BA), Major in New Media Studies (BA) and Specialist in Paramedicine (BSc) – have also recently undergone external review. The review reports have been uniformly complimentary regarding the academic rigour of the programs and their unique contributions to their various disciplines, but they have also made specific recommendations for curricular change. The academic units have responded with vigour and enthusiasm, and curricular changes are being implemented, appropriate avenues for new undergraduate and graduate curricular development are being considered, and units are actively seeking effective ways in which to help students improve both their writing and their quantitative analysis skills.

Curricular renewal at UTSC is not confined to academic units undergoing external review. For example, after conducting a review of co-operative models of experiential education and a subsequent pilot program in other types of work placement opportunities, the Department of Arts, Culture and Media recently initiated major modifications to its Specialist program in Arts Management to add a new Field Placement Stream. This new stream has replaced the Arts Management Co-op program, which was suspended to new enrolments effective 2013-14. The anticipated benefits of this model include greater access to high-quality placements that would not have qualified under the co-op model. This new model is being carefully monitored and, if successful, may be expanded to other discipline areas, such as Media Studies, where there is not a good fit with the Co-op model for placements.
A final aspect of curricular renewal includes the assessment of existing programs through the lens of current and future academic goals of each of the academic units, as well as the resources available to achieve those goals. One of the more difficult decisions academic units will need to make concerns closure of programs. Recent program closures at UTSC include the Arts Management Co-op program mentioned above, Major and Major Co-op program in Intersections, Exchanges, Encounters in the Humanities (IEE), the Minor in French for Francophones, and all streams of the Specialist in Art and Culture (BA), with the exception of Studio. In most cases the programs were developed in anticipation of meeting perceived student interest and demand, but none ultimately resonated well with our students. Upon assessing the programs, the academic units offering them concluded they no longer fit in with their academic goals, and resources allocated to them could be better utilized in other programs and academic endeavours. A new closure that will fall into this same category is the Design-Your-Own stream of the Specialist in Mathematics. This stream of an otherwise successful program has existed for many years, but student interest has always been limited. More recently, however, the Department of Computer of Mathematical Sciences has noted that its role in the program has largely been subsumed into the more flexible requirements of the Comprehensive stream.

**Tuition Fees and Student Aid**

The new provincially-mandated change to the definition of full-time study for program fee assessed students will have some impact on UTSC. The current definition of full-time as 60% of a standard full course load will increase to 70% in 2015-16 and 80% in 2016-17. Two of our program areas, Management and Computer Science, have program fees. If students in those programs opt to enroll in three courses in a session, they will be assessed on a per-course basis rather than on a full-time program fee basis, which will have a clear revenue impact for the campus. At this point, predicting the number of students likely to make this choice would be speculative at best; however, we are concerned about the potential negative impact on revenue, especially since this change will provide students with a new financial incentive to opt for three courses.

It is reasonable to predict that there will be greater call for UTSC to increase its needs-based and merit-based student aid requirements in the coming years. The campus has long held the highest percentage of OSAP-eligible students of any first-entry division, but while that figure remained stable at 51-52% during the period 2006-07 through 2010-11, in 2011-12 it jumped to 57% and in 2012-13 (the most recent year for which data are available) it jumped again to 60%. Based on available evidence, we predict that it will continue to grow. At the same time, to support its effort to improve student quality on entry while growing enrolment, the campus has intentionally devoted more resources to entrance scholarships; this will have to increase as we grow further during a period of anticipated decline in provincial applications and increasing market competition.
UTSC’s undergraduate enrolment is broadly distributed across its departmental groups as shown in Figure 1.

**Figure 1: UTSC Fall 2013 Full-Time Undergraduate Enrolment by Departmental Grouping**

![Bar Chart showing enrolment by department](chart.png)

Note: The majority of students shown as “Unspecified” are in Year 1 and have not yet selected an area of study.

**Figure 2: UTSC Fall Headcount Enrolment in Co-op Programs**

![Bar Chart showing co-op enrolment](chart2.png)

The **HUB Ideation & Experiential Learning Centre** was established in 2013 to trigger collaboration amongst students and faculty and jumpstart new and creative digital ideas in the form of technologies and commercial ventures – ranging from social media sites and mobile apps to new businesses, technologies and social innovations. Over the last year the HUB has had over 100 students participate various in programs and events.

Another area that has defined the UTSC growth story has been its focus on service learning. One example of this is our partnership with Kingston Rd Galloway community where UTSC has a classroom in the community and upper year students have the opportunity to work in partnership with residence
groups and community agencies on advocacy and research that improves the lives of residents. Examples like this have led to UTSC to prioritize service learning as a key platform for the campus and led to numerous partnership opportunities with local partners.

**Graduate Enrolment**

There are currently 240 resident graduate students on campus of which 126 are enrolled in UTSC administered programs. UTSC fully expects the resident student count to grow to 400+ in the next 5 years in line with the University’s graduate growth plan. There are currently over 650 graduate students located over all three campuses that are supervised by UTSC faculty.

**External Partnerships**

UTSC has a long standing partnership with Centennial College offering joint programs in New Media, Paramedicine, and Journalism that give students the critical thinking, analytical and technical skills needed to succeed in today’s knowledge-based economy.

The University of Toronto strongly believes in the need to support college students who transfer into undergraduate programs. Our facilitated transfer model is structured so that students receive intensive, personalized support before, during and after transfer to U of T from a partner college of applied arts and technology. We have found that transfer students in these programs are markedly more successful than those transferring from colleges without the benefit of a facilitated pathway. As an example of this commitment, UTSC has agreements with Seneca College that create facilitated transfer pathways for students studying in their general arts and science programs – the Liberal Arts Program and the Liberal Sciences Program – to join UTSC as second year degree level students having earned up to six specific transfer credits from Seneca. The first cohort of facilitated transfer students from Seneca, who were admitted to UTSC in 2013, have an average CGPA of 3.40, much higher than that of traditional transfer students and even students admitted directly from high school.

In 2012, the University joined with six other Ontario universities in forming the **University Credit Transfer Consortium** (UCTC). This initiative will enhance student mobility and streamline credit transfer among well-aligned institutions with comparable institutional mandates and student profiles.
Student Services

UTSC has the extensive list of student services that is expected of a comprehensive, full-service, 12,000 student campus. The following list provides a few examples of the services that UTSC students have access to today:

- Toronto Pan Am Sports Centre – an extensive athletics complex with gymnasiums, swimming pools, dance studios, squash courts, etc.
- Outdoor fields, tennis courts and beach volleyball courts.
- Extensive recreational instructional programs and intramural activities.
- Comprehensive food and hospitality services with multiple locations across campus.
- Academic Advising and Career Centre.
- Services for students with disabilities.
- Centre for Teaching and Learning.
- Health and Wellness Centre.
- Excellent library collection and services, fully integrated into North America’s third ranked library system.
- International Student Centre.
- Community outreach opportunities.
- Student Housing and Residence Life.
- 24 hour campus security.

In addition, our students have access to over **150 student clubs** that have matured over the last five decades.

Student Feedback

UTSC has performed consistently well in the National Survey on Student Engagement (NSSE) benchmarks. NSSE tracks effective educational engagement in practices linked to student learning, personal development and other designated outcomes. Over the last decade UTSC has made significant positive gains in the following areas:

- Active Collaborative Learning
- Student Faculty Interaction
- Enriching Educational Experiences
- Supportive Campus Environment
Meeting Demand

Regional Population Growth and Demand

The Greater Toronto Area (GTA) represents the largest catchment region for Ontario students that enrol at UTSC. Nearly 75% of UTSC students hail from the GTA, comprising the census divisions of Toronto, York, Durham, Peel, and Halton. Within the GTA, Toronto, Durham, and the rapidly-growing York region, are currently the primary sources of students, and an increasing number are enrolling from Peel.

The Ontario Ministry of Finance projects that the Province will experience enormous population growth of 27% over 2013, reaching 17.4 million people by 2036. The GTA is projected to be the fastest growing region of the province, with an increase of 2.5 million or 39.1% expected by 2036. This will increase the GTA’s share of overall provincial population from 47.6% in 2012 to 51.5% by 2036.

The population of 18-20 year olds (the typical intake age range) in the GTA is projected to increase by 19% by 2036 which will have a significant impact for the university sector. As can be seen in Table 1 and Figure 4, growth is expected to be strong in all GTA regions including the key UTSC catchment regions of Toronto, York and Durham. With the excellent transit options already in place and UTSC’s location along Highway 401, UTSC is seeing a broadening of its catchment area with increasing numbers of students coming from other areas of the GTA and beyond.

An investment in UTSC’s expansion will ensure that there are additional, high quality undergraduate spaces to meet the demand from this growing region over the next twenty years. These students will continue to have the choice to live at home and commute to campus or live in residence; and they will have access to the hundreds of high quality programs offered by the University of Toronto Scarborough.

Figure 5 further illustrates the significance of the GTA as a catchment area for UTSC.

Figure 5: Fall 2013 UTSC Undergraduate Students from the region directly surrounding the campus

Highlighted Census Sub-divisions had a material number of UTSC registrants in Fall 2013 and were located within 40km north of Steeles Ave. Census Sub-divisions located east of Markham that are within a 50km buffer of UTSC are also highlighted.
Strategic Enrolment Growth Plan at UTSC

Since 2000, UTSC has more than doubled overall enrolment to approximately 12,000 as of 2013-14 (as summarized in Table 2); demonstrating the demand for a high quality research intensive undergraduate experience. Looking forward, UTSC’s strategic enrolment plan lays out a realistic and sustainable path of growth towards a long term goal of 20,000 students.

</tbody>
</table>

The campus enrolment growth plan calls for a strategic, measured intake increase from an incoming class of 3,155 in 2013-14 to 4,322 by 2026-27. This level of intake will take UTSC to a 2034 target of 17,232 full-time and part-time undergraduates.

Using 2014-15 as the base year, UTSC’s plan calls for growth of 5,005 full-time students by 2034-35 including 4,549 additional full-time undergraduate students. Table 3 summarizes this enrolment plan and reflects the numbers provided in the separate proposal table document.

Beyond 2034-35, UTSC plans to continue to grow as newly created programs reach maturation and the GTA population expands. The post-2034 campus will ultimately enrol 20,000 students engaged in a full range of undergraduate and graduate programs.
Campus Space Plan

UTSC’s campus space plan is closely linked to enrolment growth plan and tracks the availability of space relative to the COU space standards. Table 4 provides a projection of available space relative to these standards, presently and at capital planning milestones:

Table 4: Projected Position Relative to COU Space Standards

Municipal and Regional Support

The expansion and development of UTSC is integral to Toronto’s and the local regions’ economic development strategies, and the campus is ideally situated to absorb future enrolment demands in the Eastern GTA.

These projects will build on the University’s significant investment in enhanced campus infrastructure and stimulate further growth in the heart of Scarborough, and the Eastern GTA’s growing academic centre. All levels of government recognize, through their commitment and investment in this campus, that the long-term vitality of our community is dependent on the continued expansion and development of UTSC.

The City of Toronto has contributed significantly to the development of the campus by investing and partnering with the University on the Toronto Pan Am Sports Centre. The City contributed approximately $60 million to the remediation of the project lands and construction of the facility. This investment is in addition to city land dedicated to the facility.

Through the City’s support, the development of this world-class facility enables expansion of the UTSC north campus, with profound economic, social, and cultural benefits for decades to come.

UTSC is home to many York and Durham Region students. UTSC is also strongly supported by municipal partners, such as the neighbouring City of Pickering (see Appendix A for letters of support), which continues to work closely with the University in promoting mutually beneficial partnerships and
economic development activities. Durham Region has invested in providing transit to the campus through the 923 Bayly DRT route, which promotes enhanced transit connectivity to this rapidly growing region.

**Alignment with Provincial Priorities**

UTSC is ideally positioned to contribute to Ontario’s goals of expanding access to high quality undergraduate programs, and meeting regional demand over the next 20 years. Expansion at UTSC is aligned closely with the Government’s key initiatives regarding education.

**Open Ontario Initiative**

- **Access**: A Provincial funding contribution to this expansion will enable UTSC to create more than 6,000 undergraduate spaces over the next 20 years. This supports the Open Ontario Initiative goal of raising the post-secondary education attainment rate to 70 per cent.
- **Aligning Expansion with Growth**: UTSC is located in the fastest growing region in Ontario for university-age individuals. An investment in UTSC’s expansion is congruent with the Government’s goal to ensure that expansion of spaces is closely aligned with regional growth.

**Building Together**

Expansion at UTSC is also closely aligned with the goals of Ontario’s Building Together plan, which reiterates the Government’s commitment to increase the PSE attainment rate to 70%. UTSC is guided by robust Strategic and Master Plans, and maintains detailed asset management plans to ensure that its facilities are closely monitored and space utilization is maximized; including full trimester scheduling. This supports the priority for effective asset management stated in the Building Together plan.

**Places to Grow and the Growth Plan for the Greater Golden Horseshoe**

The Growth Plan discusses the importance of intensification and posits that better use of land and infrastructure can be made by directing growth to existing urban areas. UTSC is uniquely situated to facilitate growth within Toronto and the surrounding growth centres including Markham Centre, Richmond Hill, Downtown Pickering and Downtown Oshawa where many of our students originate and call home.

UTSC is strategically positioned to accommodate much of the growing population demand for the Eastern GTA as dictated on the Growth Plan with world-class faculty and facilities and through efficient use of our existing and future infrastructure as outlined in our Master Plan. Our plan will ensure that UTSC has the right spaces in the right places at the right time.

**Putting Students First**

UTSC is a thriving, comprehensive, full-service campus with extensive facilities, and program offerings for 12,000 students at both the undergraduate and graduate levels. Unlike a new campus development, all students attending UTSC have immediate access to an extensive array of facilities and services on day one of their university career.
Demonstrated Affordability

Proven Track Record to Build and Manage Infrastructure

UTSC is already a comprehensive, full-service campus, with extensive ancillary-, academic-, and student-support services in place. Over the last decade, over $500 million has been invested in new infrastructure at the campus to accommodate burgeoning growth, as detailed in Table 5.

Starting with the Superbuild program in 2001, UTSC has undertaken in excess of 16 major projects to accommodate student enrolment growth. As can be seen in Table 5, all of these projects were completed within or under budget and on time. Several of these projects addressed shortfalls in infrastructure (Mechanical and Electrical) to accommodate current and future growth. The experience and success gained in this process serves to underline the confidence and expectation that future projects will have the same results.

Current design philosophy has changed since those earlier days in that newer designs have stressed greater emphasis on sustainability to lower ongoing operating costs. In fact, the last two constructs are expected to be awarded LEED Gold status, while ongoing renovations at UTSC also stress energy efficiency at every opportunity.

UTSC, along with its partners at other Ontario universities, utilizes the same software program (VFA) to identify and action major maintenance issues over the life cycle of major building components.
**Housing and Transportation Connections**

UTSC operates close to 800 student residence beds distributed among types of housing that include townhouses and apartment style units. This capacity allows UTSC to fulfill the University of Toronto’s **guarantee of on-campus housing to first-year students**. UTSC is also undertaking the development of 750 bed, full-service and academically linked residence to ensure students continue to have the choice to live in residence while accommodating the growing enrolment demand.

In addition, the growth of the campus has resulted in positive investment into and revitalization of the surrounding community; most recently evidenced by the proposed development of a condominium targeted to serve the growing student population.

UTSC will also continue to ensure an outstanding experience to its commuter population, providing access to thousands of students who are able to attend the university while living at home. UTSC is investing in the construction of a **parking structure** to promote more efficient land use, and ensure that the campus has sufficient spaces to accommodate future growth.

**Smart Commute Scarborough** was launched at the 2013 UTSC EcoSummit, with UTSC playing an integral role. Smart Commute Scarborough will improve student awareness and access to alternative transportation modes. As a member of Smart Commute Scarborough, UTSC also has access to Smart Commute’s carpooling program which provides a ride-matching service for students and staff.

The campus is in close proximity to its urban catchment areas, providing reasonable commute times for car-based travel as shown in Table 6.

Source: TOMTOM travel data

**Extensive Public Transit Options**

Every day, thousands of students, staff and faculty travel to UTSC from all areas of the GTA. Investments by Durham Region, GO and the TTC are providing a wide array of **enhanced transit connectivity services** to the campus for the growing population base across the City and region.
TTC
Bus service transports students, staff and faculty to the campus transit court from Scarborough Town Centre, Kennedy and York Mills Stations, and the Rouge Hill and Guildwood GO Stations.

Effective September 1, 2014, the 198 U of T Scarborough Blue Rocket Express began running between Kennedy station and the UTSC campus, Monday to Friday, every 10 minutes on mornings, and 15 minutes during evenings, with an average travel time to Kennedy Subway of 30-minutes. The 198 will also make stops at major intersections along the route, which travels from Kennedy along Eglinton Avenue before continuing along Kingston Road and Morningside Avenue.

GO Buses
GO Bus service operates between the York University GO station in the west and the Pickering GO station in the east; operating generally in an east-west direction, with a frequency of approximately every 30 minutes. UTSC is in discussions with GO Transit to re-establish service between Unionville GO Station and UTSC.

Durham Region Transit (DRT)
The 923 Bayly DRT route operates between UTSC and the Ajax GO Station via the Pickering GO station generally in an east-west direction along Bayly Street, Kingston Road and Military Trail. This route has proved to be very popular with a ridership that has exceeded 200% of anticipated levels.

Figure 6: Transit Routes
**Student Financial Support**

The University of Toronto maintains a deep and abiding commitment to financial support and counselling for its students. As articulated in the Governing Council Policy on Student Financial Support (approved by Governing Council in April 1998): “No student offered admission to a program at the University of Toronto should be unable to enter or complete the program due to lack of financial means.”

To support this policy, the University provides $165 million annually in student financial assistance and awards and substantially exceeds the Provincial requirements under the Student Access Guarantee program (Figure 7).

**Figure 7: University of Toronto’s SAG Expenditures by program type and requirement.**

Appendix A

UTSC Performance Measures

The following tables and charts have been assembled from the Divisional Statistics data prepared by Office of the Vice-President, University Operations over the past four years.

Fall FTEs data shown in Table 1 and Figures 1 and 2 below exclude students in certificate and diploma program, as well as visiting students, non-degree seekers and special students. 2014-15 data are currently only available for UTSC.

Figure 1: Undergraduate FTEs – Variance from Target

The data show increasing negative variances from target after 2011-12 for UTSC. Table 1 below shows that the majority of this negative variance for UTSC is for domestic students.

Table 1: Fall FTE Variance from Target, by Domestic and International Student Status

</tbody>
</table>
Figure 2: Percentage International FTEs of Total UTSC Fall FTEs

![Graph showing percentage international FTEs of Total UTSC Fall FTEs from 2010-11 to 2013-14.]

Figure 2 shows that UTSC proportion of international students of total Fall FTEs has been increasing steadily over the past four years. Our plan is to reach 17% over the next planning cycle and eventually 20% in the longer term.

Figure 3: Undergraduate Arts & Science Entering Marks by Campus

![Graph showing Arts & Science Entering Average Marks from 2000 to 2013 by campus: UTM, FAS, UTSC.]

Average entering marks data shown in Figure 3 are from the Performance Indicators for Governance reports. Entering averages for each campus have increased annually since 2010-11.
Figure 4: Undergraduate Summer FTEs as Percentage of Prior Year Fall FTEs

<table>

<td>11.4%</td>
<td>10.8%</td>
</tr>
</tbody>
</table>

Data for Figure 4 above are as of official count dates. FTEs include students in certificate and diploma programs, visiting students, non-degree seekers and other special students.

UTSC’s proportion of summer FTEs of prior year fall FTEs exceeds the university average, although this metric shows a decline for both UTSC and the overall university average beginning 2010.

Figure 5: Student FTE per Faculty FTE

<table>
<thead>

</tr>
<tr>
<td>U of T</td>
<td>24.4</td>
<td>24.4</td>
<td>25.5</td>
<td>25.7</td>
</tr>
</tbody>
</table>

Student : Faculty and Faculty : Staff ratios are shown in Figures 5 and 6 below. Student FTEs exclude students in certificate and diploma programs, visitors and other special students. Faculty FTEs are per the HR Annual Report, including faculty with tenure stream and teaching stream appointments of 25% or greater, research funded faculty, excluding clinicians, research fellows, and teaching assistants.

Data show a slight rise in the ratio of students per faculty for all three divisions as well as the U of T average, with very little difference between UTSC and FAS by 2013-14. UTM continues to have the highest ratios.
Figure 6: Academic Staff FTE per Faculty FTE

<table>
<thead>
<tr>
<th></th>
<th>2010-11</th>

<td>45.68</td>
<td>97.76</td>
<td>50.11</td>
<td>95.16</td>
</tr>
</tbody>
</table>

Space data shown in Figures 8 and 9 are from the centrally maintained Campus Planning & Facilities space inventory. Student FTEs include Fall undergraduate and professional master’s students. Faculty FTEs include professoriate and teaching stream faculty as per HR Annual Reports.

UTSC has the lowest teaching space per FTE student and the lowest research & academic office space per FTE faculty compared to FAS and UTM. The University average is higher than FAS for teaching space per student but slightly lower than FAS for research and academic office space per student.
As noted above the last 2 years has seen challenges in reaching enrolment targets given 1) demographic trends across the system and 2) UTSC increasing the minimal high school entrance average threshold.
## Appendix B: Potential Areas of Growth and New Programs/Program Directions

<table>
<thead>
<tr>
<th>Program Area</th>
<th>Program</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anthropology/Health Studies</td>
<td>Health Studies – Population Health, BSc (non Co-op and Co-op)</td>
<td>The Major program in Health Studies was redesigned in 2013-14 as distinct BA and BSc programs. These programs respond specifically to student interest in the area of human health, as well as a growing societal need to better understand the complex issues surrounding human health. In addition they take full advantage of the strong ties and collaborations with the many units of the University that are part of the health sector in the Toronto area.</td>
</tr>
<tr>
<td>Anthropology/Health Studies</td>
<td>Wellness</td>
<td>Building on the new Toronto Pan Am Sports Centre UTSC is now developing new programs that leverage this facility to explore health and wellness program linked to health studies.</td>
</tr>
<tr>
<td>Anthropology/Health Studies</td>
<td>Health Management</td>
<td>New initiative currently being developed in concert with the Institute of Health Policy, Management and Evaluation (IHPME) and the Dalla Lana School of Public Health</td>
</tr>
<tr>
<td>Anthropology/Health Studies</td>
<td>Combined Program Degree, UTSC, BSc in Health Studies – Population Health (non Co-op and Co-op)/ MSc in Rehabilitation Science</td>
<td>Students in the Health Studies program have expressed an interest in continuing their studies at the graduate level in related fields; the Graduate Department of Rehabilitation Science recognizes the Health Studies program produces an excellent pool of potential graduate students. The Combined program establishes an ideal pathway for both UTSC students and the GDRS.</td>
</tr>
<tr>
<td>Arts, Culture and Media</td>
<td>Journalism and Journalism Co-op</td>
<td>Where Journalism programs in other post-secondary institutions are seeing declining enrolments, the UTSC Journalism program (Joint with Centennial College) is experiencing both steady growth, and increasing demand such that current enrolment is 150 students. These programs in Journalism respond to this growing demand.</td>
</tr>
<tr>
<td>Biological Sciences</td>
<td>Molecular Biology, Immunology, and Disease, BSc</td>
<td>This program, which takes advantage of existing faculty research and teaching expertise in the Department of Biological Sciences, is an attractive option for students interested in molecular biology, biomedical science, disease biology, immunology, and biotechnology. Graduates of the program will contribute broadly to the health and technology sectors.</td>
</tr>

<td>Human Geography</td>
<td>City Governance, BA</td>
<td>Canada is an increasingly urban nation, with most Canadians living in large metropolitan areas. The nation’s city-regions are widely recognized as engines of economic growth, yet they also show persistent problems, including income polarization and poverty, the un- and underemployment of immigrants, infrastructure deficits, and traffic gridlock. This program, which takes advantage of existing faculty research and teaching expertise in the Department of Human Geography, focuses on the distinctive policy challenges and opportunities posed by cities.</td>
</tr>
<tr>
<td>Management</td>
<td>Management and International Business, BBA (Co-op only)</td>
<td>This highly qualitative business degree is focused on business in an international context. The only undergraduate program in international business offered at the University of Toronto, the MIB, which takes advantage of existing faculty research and teaching expertise in the Department of Management, provides solid grounding in core management functions, leadership in cross-cultural contexts and foreign language development.</td>
</tr>
<tr>
<td>Management</td>
<td>Strategic Management - Entrepreneurship, BBA (non Co-op and Co-op)</td>
<td>The Entrepreneurship stream of the Specialist in Management, which takes advantage of existing faculty research and teaching expertise in the Department of Management, encourages students to think about self-employment/entrepreneurship as a potential career path, and provides them with the skills they need to be successful entrepreneurs. The stream developed in response to strong student demand, and specifically addresses a gap in the knowledge and experience offered to students at the University of Toronto, and more broadly.</td>

</table>
| Physical and Environmental Sciences              | Master of Environmental Science – Conservation and Biodiversity, MEnvSc | • The interdisciplinary Field in Conservation and Biodiversity, which takes advantage of existing faculty research and teaching expertise in the Department of Biological Sciences and Graduate Department of Physical and Environmental Sciences, emphasizes conservation and biodiversity. Its primary aim is to train professionals in the application of ecological theory and principles to real-world conservation challenges. This Field responds to growing career opportunities in the green and sustainability sectors.  
• The Field in Climate Change Impact Assessment, which takes advantage of existing faculty research and teaching expertise in the Graduate Department of Physical and Environmental Sciences addresses the growing societal need for science-based, policy relevant expertise in assessing the impacts of climate change. This Field responds to growing career opportunities at all levels of government and in the consulting sector. |
<p>| Physical and Environmental Science/Political Science | Environmental Studies, BA | There is a significant public and student interest in environmental issues, but many students do not have the science and mathematics background necessary to study environmental science. This program emphasizes the social context of environmental issues and potential solutions within this realm. It is a truly interdisciplinary program shared between Environmental Science and Political Science, which takes advantage of faculty research and teaching expertise in both these disciplines. |</p>

UNIVERSITY OF TORONTO SCARBOROUGH CAMPUS COUNCIL

REPORT NUMBER 7 OF THE CAMPUS AFFAIRS COMMITTEE

September 16, 2014

To the University of Toronto Scarborough Campus Council, University of Toronto Scarborough

Your Committee reports that it met on Tuesday, September 16, 2014 at 4:00 p.m. in the Council Chamber, Arts and Administration Building, with the following members present:

**Present:**
Ms Sue Graham-Nutter (Chair)
Professor Bruce Kidd, Interim Vice President & Principal
Mr. Andrew Arifuzzaman, Chief Administrative Officer
Professor Rick Halpern, Dean and Vice Principal (Academic)
Mr. Desmond Pouyat, Dean of Student Affairs
Ms Erin Bradford
Dr. Jonathan S. Cant
Dr. Tarun Dewan
Ms Kathy Fellowes
Ms Teresa Gomes
Dr. Brian Harrington
Mr. Kamal Hassan
Ms Hannah Yukari Hori
Ms Jessica Paulina Kirk
Ms Permijit (Pam) Mann
Mr. Russell Polecina
Ms Kirsta Stapelfeldt
Ms Tammy Tennisco
Dr. Erin L. Webster

Mr. Larry Whatmore
Dr. Helen Wu

**Non-Voting Assessors:**
Ms Helen Morissette
Ms Frances Wdowczyk

**Secretariat:**
Mr. Louis Charpentier
Mr. Lee Hamilton
Ms Amorell Saunders N’Daw
Ms Rena Parsan

**Regrets:**
Professor William A. Gough
Professor Ken W.F. Howard
Professor Ping-Chun Hsiung
Professor Sohee Kang
Ms Lydia V.E. Lampers-Wallner
Mr. Hussain Masoom
Ms Charmaine Louise C. Ramirez
Mr. Mark Henry Rowswell

**In attendance:**
Ms Jennifer Bramer, Director, Academic Advising and Career Centre
Mr. Tahsin Chowdhury, President, Scarborough Campus Students’ Union (SCSU)
Mr. Brent Duguid, Director of Partnerships and Legal Counsel
Mr. Kaleab Mulatu, Vice-President, Operations, SCSU
1. Chair’s Remarks

The Chair welcomed members and guests to the first meeting of the UTSC Campus Affairs Committee for the 2014-15 governance year. She introduced herself along with the Vice-Chair, the Vice-President and Principal, the Assessors and the Non-Voting Assessors, and asked each member to introduce themselves.

2. Assessors’ Reports

The Chair invited Mr. Andrew Arifuzzaman, Chief Administrative Officer (CAO) to present his report. He advised the Committee that three major capital projects would be brought forward during this governance year (Highland Hall, a parking structure and a student residence). He briefly outlined the formal process for completing a project planning report, including the approval pathways and the project planning report content (i.e. executive summary, project background, project description, resource implications, and recommendations).

3. Orientation

The Chair and Ms Amorell Saunders N’Daw, Director of Governance and Assistant Secretary of the Governing Council provided an orientation presentation to the Committee. The presentation highlighted the following:

- Overview of the Governing Council and its Boards and Committees;
- Expectations of members;
- Governance pathways;
- Role of the Administration, Assessors and the Secretariat; and
- Meeting preparation.

4. 2014-15 Calendar of Business

The Chair reported that the proposed Calendar of Business for the 2014-2015 governance year was included in the agenda package. She emphasized that it was a living document and that as such it was updated regularly. In addition, she highlighted that the approval pathways for particular items were outlined in the Calendar.

5. UofT Integrated Budget Process Presentation

The Chair introduced and welcomed Professor Scott Mabury, Vice-President, University Operations. Professor Mabury reported that he would be presenting the presentation along with Mr. Andrew Arifuzzaman and Mr. Trevor Rodgers, Senior Manager,
Academic Planning, Analysis, and IT Initiatives.

The presentation addressed the following main points:

- The current long range budget guidelines at the institutional level were prepared in the context of a significant Provincial budget deficit and declining public investment in higher education. Over the last decade, the Provincial operating budget had declined from 44% to 32% of total operating revenues.
- The Province had set out a new four year tuition fee framework that capped the average annual tuition fee increases for domestic students at 3%. Tuition fees for international students were market driven.
- Current low interest rates had an impact on investment returns and future pension liabilities, and the declining Canadian dollar had implications for both cross-border capital purchases and tuition fees for international students.
- In 2014-15 a balanced budget was projected at the institutional level ($2.0B). However, the University had a structural deficit of approximately 1.5% annually that must be closed by a combination of revenue growth and cost containment.
- Revenue growth at UTSC currently exceeded the average rate of growth for academic divisions as a result of planned undergraduate enrolment expansion. The rate of revenue growth for the University and UTSC was expected to slow down by the end of the planning period. The University’s budget model aimed to minimize administrative costs, support inter-divisional activities, and provide incentives for academic divisions to generate revenues and decrease costs.
- Divisions were allocated 90% of the operating revenues they generated and were obligated to cover their respective share of institution-wide expenses. The remaining 10% of general revenues were distributed via the University Fund (UF) based on academic plans and institutional priorities.
- In 2012-13, $164M of operating funds was provided in student assistance. Students at UTSC with financial need paid, on average, 54% of the posted tuition fee, while the remaining 46% was covered by UofT bursaries and non-repayable grants from the Ontario Student Assistance Program (OSAP).
- In 2014-15, UTSC had a revenue budget of $188.9M, of which 94% came from operating grants and tuition, and a 3% came from the UF.
- In 2014-15 expenditures accounted for $183.1M at UTSC, which were mostly made up of compensation costs and capital projects/ renovation projects.

In response to a question as to how it would be possible to advance the academic mission of the institution within the current budget framework, Professor Mabury explained that, in part, attention needed to be placed on expenditures. He commented that a thorough examination of currently used resources was a good starting point to determine where costs could be reduced.

---

2 UofT Integrated Budget Process presentation
6. Committee to Review the UTM and UTSC Campus Council: Consultation

Mr. Louis Charpentier, Secretary of the Governing Council, provided an update on the Committee to Review the UTM and UTSC Campus Councils (CRCC). He reported that the Committee was established to evaluate the efficacy of the tri-campus governance model and the manner in which it had been implemented and also to report its findings. Mr. Charpentier added that the Committee was charged with making recommendations, which would enhance the ability of the Campus Councils and its Committees to execute their respective mandates. He advised the Committee that public town halls would be held at UTM and UTSC in early November along with a Call for Submissions. He closed by saying that the report of the CRCC was expected to be considered by the Governing Council for approval at its meeting on December 11, 2014.

7. Strategic Topic: Childcare Services at UTSC

The Chair invited Mr. Andrew Arifuzzaman to introduce the item, and he called upon Ms Frances Wdowczyk, Director, Business Development & Special Advisor to the CAO Operations and Special Projects, and Ms Joanne Quinn, Director of the N’sheemaehn Child Care Centre, to present the item. Ms Quinn reported that the Centre had been a part of the campus community for twenty-four years and that forty-three percent of the children at the Centre were children of faculty, staff, and students at UTSC. In addition, Ms Quinn noted that the Centre typically hired UTSC students as part-time staff (specifically those with an interest in careers with children), and that the Centre was also considered a learning facility for students enrolled in the Early Childhood Educator college programs. She concluded her presentation by commenting on the good relationship that the Centre had with UTSC which was evidenced through the children’s visits to the Doris McCarthy Gallery, their access to the dance studio, and their participation in campus events, such as the annual Remembrance Day ceremony.

In response to a question from a member, Ms Quinn reported that the Centre would like to accommodate more families (there was a long waiting list), but that doing so would affect the quality of care and culture of the Centre.

Report Number 6 (April 28, 2014) was approved.

9. Business Arising from the Report of the Previous Meeting

The Chair reported that the data from the online evaluation survey was being compiled and that the results would be shared with the Committee at a future meeting.
10. Date of Next Meeting – Tuesday, November 11, 2014 at 4:00 p.m.

The Chair reminded members that the next scheduled meeting of the Committee was on Tuesday, November 11, 2014 at 4:00 p.m. in the University of Toronto Scarborough Council Chamber, Arts and Administration Building, Room 160.

11. Other Business

No other business was raised.

The meeting adjourned at 6:19 p.m.

Campus Affairs Committee
Orientation

September 16, 2014
The UTSC Campus Council and its Standing Committees

UTSC Campus Council

- Agenda Committee
- Academic Affairs Committee
- Campus Affairs Committee
UTSC Campus Council & Committees

Description

• Campus Councils: comparable to the Boards of Governing Council and comprise representatives of the five estates; oversight of campus-specific matters.

• Campus Affairs Committees: include a majority of members from the internal community.

• Academic Affairs Committees: relatively large reflecting the structure of Academic Board.

• Agenda Committees: have agenda setting role and delegated responsibilities.
Local decision-making

• Committee members provide approval, oversight and advice on items of business being brought forward.
• Items of business can be approved, rejected or referred back to the administration.
• Motions can be approved, recommended for approval or confirmation.
• Campus Council is final body of consideration at campus level; motions passed are subject to Executive Committee confirmation.
Expectations of Committee Members

• Reflect the perspective of your estate in debate, as appropriate, but act in the best interests of the institution as a whole.
• Read meeting documentation in advance to facilitate informed participation. Attention to Cover Sheet.
• When possible alert assessors in advance to substantive questions to be asked at the meeting (so they can prepare).
• Attend meetings; participate in discussion.
• Act ethically and in good faith; declare all conflicts of interest.
Key Elements of the CAC Terms of Reference

• Matters that concern the quality of student and campus life.

• Monitoring, reviewing and making recommendations concerning a broad range of planning issues and priorities for campus resources.

• Matters that impact relationships among campus units and relationships between the campus and the community at large.
The UTSC Campus Affairs Committee

Areas of Responsibility:

- Budget
- Campus and student services, student societies and campus organizations
- Campus Master Plans, capital plans, projects and space
- Compulsory non-academic incidental fees
- Establishment, termination or restructuring of academic units and proposals for Extra-Departmental Units (As & Bs)
- Relations with campus’s external community

Membership: 34 members

- 4 administrative staff
- 4 community members
- 1 librarian staff
- 9 teaching staff
- 7 students
- 6 *ex officio* members
- 3 Presidential Assessors
Role of Administration/Assessors

• Administration manages the University.
• Function of governance is to sustain and advance the University’s mission; focuses on legislative and judicial matters.
• Governance bodies receive proposals and reports from the administration.
• Proposals may be...
  • Approved
  • Rejected
  • Referred back to the administration with advice.
Role of Administration/Assessors

• Presidential Assessors are included in the membership of Boards and Committees *(ref. TOR & By-law Number 2)*.

• Senior Assessors assist with the discharge of the President’s responsibilities with respect to the Committees.

• Voting Assessors are members of the University’s administration who bring items for consideration.

• Voting Assessors provide recommendations for action on the items.

• Non-voting Assessors serve as subject-matter experts to the Committees.
CAC’s Presidential Assessors

Voting Assessors
Mr. Andrew Arifuzzaman, 
Chief Administrative Officer (CAO);
Professor Rick Halpern,
Dean & Vice-Principal (Academic);
Mr. Desmond Pouyat,
Dean of Students Affairs.

Non-Voting Assessors
Ms Helen Morissette,
Director, Financial Services;
Ms Frances Wdowczyk,
Director of Business Development & Special Advisor to the CAO.
Establishment of an Academic Unit (EDU A or EDU B)
Approval of Capital Project (Level 3)
Compulsory Non-Academic Incidental Fees
Budget
Role of the Secretariat

• Provides support to Committee/Council Chairs and Committees:
  – Meeting preparation
  – Meeting follow-up
  – Communicate Council/Committee decisions
  – Manage governance records
  – Maintain Council and Committee membership records
  – Expert resource/policy advice
Meeting Agendas

• Agenda planning is based on the Calendar of Business; an overview of all anticipated business to be transacted in the governance year.

• Agenda planning is the “hand-off” from the administration to governance.

• Setting the agenda for Committee meeting is the responsibility of the Agenda planning group.
Meeting Agendas

• Meeting agendas may include:
  – Chair’s Remarks
  – Assessor Reports
  – Approval items
  – Reports/Presentations
  – Consent Agenda
    • Items for which there may be little or no discussion/debate because they are more routine or transactional in nature;
    • Committee members may request to move a Consent Agenda item to the regular Agenda in advance of the meeting.
  – Other business
  – In camera items
Meetings

• Meetings may be held in open session, closed session or in camera:

• **Open Session:**
  – Open to members of the University, the public, the media, up to room capacity. Most Council, Board and Committee meetings meet in open session.

• **Closed Session:**
  – Restricted to members of the Council, Board or Committee and individuals whose presence is considered by the Committee to be necessary (normally members of the administration). Motion needed to move from open to closed session.

• **In Camera:**
  – A meeting or part of a meeting may be held in camera where “intimate financial or personal matters of any person may be disclosed.” *(By-law Number 2)*
  – Motion needed to go into in camera session.
Decisions

Proposals may be:
• Approved
• Rejected
• Referred back to the administration with advice.

Motions may be:
• For Approval
• Recommendation for approval
• For Confirmation
Cover Sheets

1. General
2. Header Information
3. Sponsor & Presenter
4. Jurisdictional Information
5. Previous Action Taken
6. Highlights
7. Recommendation
Agenda packages

• Agenda packages are finalized and posted a week prior to the Committee meeting.

• Non-confidential meeting material is posted to the UTSC Campus Council website: http://www.utsc.utoronto.ca/governance/
Diligent Boardbooks

• Only tool used to distribute confidential meeting documentation to members, and therefore the expectation is that all members make use of it
• Password protected
• Instructions for setup: http://uoft.me/DBBInstructions
• User Name: “firstname lastname” and the temporary Password is “July2014”.

UTSC Campus Affairs Committee Meeting - Report of the Previous Meeting: Report 7 – September 16, 2014
Calendar of Business: Highlights

- A new home for Athletics & Recreation
- Highland Hall Capital Project
- UTSC Budget Overview presentation
- Capital Project: Parking Structure
- U of T Mental Health Framework: local implications
- Infrastructure Planning
- Capital Project: Student Residence
- Our Growing Campus: Security Implications
- Ancillary Operating Plan, 2015-2016
- Campus Operating Budget
- Student Societies: Requests for fee increases
Overview of UTSC

• U of T’s eastern GTA campus
• Celebrating 50th anniversary
• More than 11,500 students from 80 countries
• More than 150 student groups
• Net operating budget: $134.8 million
• Faculty & Staff: 830.8
• Campus area in acres: 303
• Number of buildings: 34
• Number of student residence spaces: 765
• Number of alumni: 42,592

Student Aid
Net Revenue to Academic Divisions
University Fund

- Created by a 10% deduction from gross revenues, excluding segregated funds
- Intended to strengthen quality and provide stability, consistent with academic priorities
- Allocations based on academic plans and institutional priorities; not tied to revenues and costs
University Fund Relative to Total Expense Budget ($ millions)
University of Toronto Student Assistance 2012-2013
Total = $164M

UTAPS and Bursaries 65M
Graduate Fellowships 41M
Merit Awards 34M
OGS/OGSST 16M
Other 8M

In 2012-13 graduate students also received $147M in external funding and employment income.
