

HOW TO KNOW ...

PHISHING

University web and email accounts are tempting targets for phishers! Being sure that you are giving your UTORid and password to legitimate University services is as easy as **LOOK, CHECK, and SEE...**

Phishing attacks target personal information by impersonating known, trusted web sites.

They do this to steal money, identity, and attack other users

LOOK to see it's a secure web site - look for **https** in the location bar

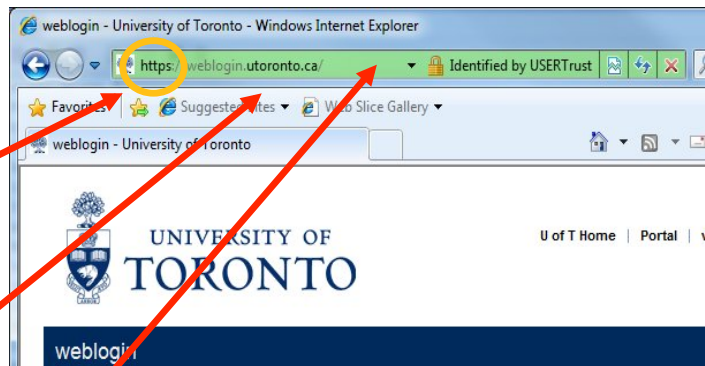

CHECK the address – to log into any web service, you should only give your UTORid and password to **weblogin.utoronto.ca**

SEE the **GREEN BAR** – your browser should show a green bar or green text

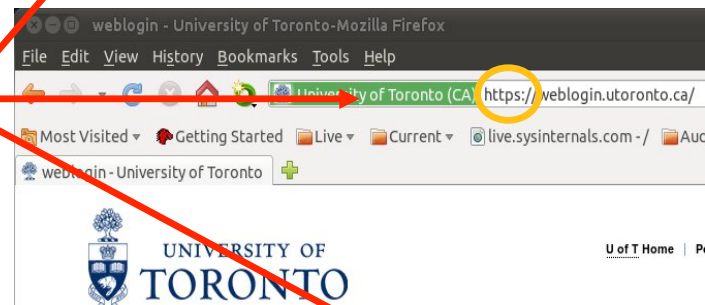

**CHECK,
LOOK &
SEE.**

**KNOW.
BE SAFE.**
