If you are experiencing difficulty connecting, you may need to verify your UTORid account credentials. Please visit this website: [https://www.utorid.utoronto.ca/cgi-bin/utorid/verify.pl](https://www.utorid.utoronto.ca/cgi-bin/utorid/verify.pl) If everything is ok, you should see the message: "Your UTORid and password have been checked and should work."

**AUTOMATIC SETUP**

1. Right-click the **wireless network icon** in the bottom right corner of your screen and choose **Open Network and Sharing Center**.

2. In the next window, click **Manage wireless networks** located on the left pane.

3. In the next window that appears, click on **Add** to create a new wireless connection.

4. In the next window that appears, select the option **Manually create a network profile**.

5. Ensure you enter the information correctly shown below. Click **Next** to proceed.

6. Click the option **Change connection settings**. You’ll see another window pop-up. Under **Security**, ensure the settings reflect what’s shown below.
7. From Step 6, click on **Settings**. In the new window that appears, ensure the settings match below. Click on **Configure** and ensure the option “Automatically use my Windows login name and password” is unchecked.

8. Go back to Step 6 and click on **Advanced Settings**. Under the tab **802.1X settings**, check **Specify authentication mode** is set to **User Authentication**.

   Click on **Save credentials** and enter your **UTORid** and password when prompted. Click **OK**.
