"Environmental Pollution"
(EES A11)

Instructor: Dr. Jovan R. Stefanovic

Office: EV 402

Lecture: Thursday 5 – 7pm (SY110)

Email: jovan.stefanovic@utoronto.ca

Phone: 416.287.7224

Office hour: Mondays 12-1pm (from Jan.22)

Teaching Assistants for the assignment: Bryan Flood, Andrew Apostoli
Teaching Assistant for quizzes: Yuchao Wan
TAs office, emails and office hours: TBA on Blackboard

Specific readings will also be given out for some lectures.

The intent of the course:

This course provides students an introduction to issues related to environmental pollution, with emphasis on causes, pathways, risks, mitigation and prevention. By the end of this course, students will have a good understanding of the dynamic nature of human-environment relationships, and the multidimensional characteristics of environmental pollution, through the use of Canadian and international examples. Special emphasis will be placed on issues related to eutrophication phenomena, exotic species invasions, water quality/fisheries management, energy, mining and waste management.
COURSE LEARNING OBJECTIVES:

- Identify a range of human uses of fresh water and their impacts on freshwater environments
- Describe the impacts of human activities on the atmosphere
- Outline Canadian and international responses to protect the atmosphere
- Understand the various categories of waste
- Appreciate the approaches to management of different types of waste
- Discuss energy resources and their environmental impacts
- Outline Canadian and international responses to energy issues

Tentative Course Schedule

Students should note that topics may span more than one lecture period

Week | LECTURE TOPICS
--- | ---
1. | **An overview of the course, expectations, and objectives.**
   **Understanding Pollution** Jan. 11th
   Humans are massively changing the Earth
   Why does pollution happen?
   Global pollution and global environmental health
   Root causes
   Our actions have consequences

2. | **Air Pollution (Part I)** Jan. 18th
   Criteria air pollutants
   Air Quality Management System
   Hazardous air pollutants

3. | **Air Pollution (Part II)** Jan. 25th
   Pollution from space
   Air pollution in less-developed countries

4. | **Global Climate Change (Part I)** Feb. 1st
   A warming Earth
   Significant Elements of Our Changing Climate
   Greenhouse gases and their sources
   QUIZ #1

5. | **Global Climate Change (Part II)** Feb. 8th
   Assessing global climate change
   Industry and government action to reduce emissions

6. | **Stratospheric – Ozone Depletion** Feb. 15th
   The stratosphere and ozone
   Antarctica
   Consequences of ozone depletion
   Ozone-depleting pollutants
Reducing atmospheric levels of ozone-depleting substances

**QUIZ #2**

**Reading Week – University closed** .................................................. Feb. 22nd

7. **Midterm Examination** (during class time) ........................................... Mar. 1st

8. **Water Pollution** .............................................................................. Mar. 8th
   - Conventional and Priority Pollutants
   - Impacts of Pollution on Water Bodies
   - The “Nitrogen Glut”
   - Basic Concepts of Eutrophication

9. **Water and Wastewater Treatment** ............................................. Mar. 15th
   - Drinking water standards
   - Drinking Water Treatment Process
   - Reducing Point and Non-Point Sources (Treating Wastewater)
   - DVD: “Last Call at the Oasis” or “Senegal: Water Treatment and Distribution”
   - **QUIZ #3**

10. **Solid and Hazardous Waste** ....................................................... Mar. 22nd
    - Waste is a sign of inefficiency
    - Canada’s Waste Stream
    - Waste – Management Hierarchy
    - The Fate of Disposed Municipal Solid Waste
    - Managing Hazardous Waste

11. **Energy and Mining** ..................................................................... Mar. 29th
    - Energy Resources and Environmental Impacts
    - Emerging Energy Resources and Technologies
    - Environmental Impacts of Mining
    - **QUIZ #4**

12. **The Way Forward in Environmental Pollution Control;**
    **Course Review** ............................................................................ Apr. 5th

**MID-TERM EXAMINATION**
The midterm is based on material covered in lectures and readings up to and including the class before the midterm exam. The 2-hour mid-term examination will be held on March 1 (5 to 7pm) in class. The exam will be multiple-choice, true-false and short answer questions (DVDs if used in lecture) and will be worth 30% of the final grade.

**MISSED TEST**
If you miss the test with a verifiable reason (i.e. you have a Doctor’s note or have made provisions for a VERY good reason with the professor PRIOR to the mid-term), please submit the proof for your absence. If the reason is medical, an official UTSC medical note must complete by a doctor who examined you while you were ill/injured. The medical note can be downloaded at http://www.utsc.utoronto.ca/~registrar/resources/pdf_general/UTSCmedicalcertificate.pdf.

**You must submit appropriate documentation within 10 business days of your absence.**
If you simply “miss” the mid-term, you will receive a mark of zero for it.
FINAL EXAMINATION
The 2-hour final examination will be held during the final examination period, exact time, date and rooms TBA. The exam is worth 40% of the final grade. It will be a combination of multiple choice and true-false questions. The final exam will be based on selected term material (including readings, lectures and DVDs).

ASSIGNMENT AND QUIZZES
One written assignment will be introduced at the beginning of February. Detailed information about the assignment you will get from your TAs. Quizzes (20-30 minutes duration) will consist of MC and True/False questions and will cover lecture material from previous week(s). Tentative dates for quizzes are given in the course schedule. More information about quizzes will be circulated during the semester.

MISSED TERM WORK: If a legitimate reason prevents you from submitting a piece of term work (written assignment) by its posted deadline, you must submit appropriate documentation within ten business days of your absence. If the reason is medical, an official UTSC medical note must complete by a doctor who examined you while you were ill/injured (i.e. not after the fact). The medical note can be downloaded at http://www.utsc.utoronto.ca/~registrar/resources/pdf_general/UTSCmedicalcertificate.pdf. Note that conditions ranked as mild or negligible will not be considered a valid excuse.

PLAGIARISM: Assignment is checked for plagiarism. Please consult the University Calendar for a discussion and outline of the policy on plagiarism and academic integrity (also see proceeding section below). The sanctions can be severe. If, after reviewing the University policy, you are uncertain about what constitutes plagiarism, talk to your course instructor.

ACADEMIC INTEGRITY: Academic integrity is essential to the pursuit of learning and scholarship in a university, and to ensuring that a degree from the University of Toronto is a strong signal of each student’s individual academic achievement. As a result, the University treats cases of cheating and plagiarism very seriously. The University of Toronto’s Code of Behaviour on Academic Matters (http://www.governingcouncil.utoronto.ca/policies/behaveac.htm) outlines the behaviors that constitute academic dishonesty and the processes for addressing academic offenses. All suspected cases of academic dishonesty will be investigated following procedures outlined in the Code of Behaviour on Academic Matters. If you have questions or concerns about what constitutes appropriate academic behavior or appropriate research and citation methods, you are expected to seek out additional information on academic integrity from your instructor or from AccessAbility Services Office as soon as possible. I will work with you and AccessAbility Services to ensure you can achieve your learning goals in this course. Inquiries are confidential. The UTSC AccessAbility Services staff (located in S302) are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations. (416) 287-7560 or ability@utsc.utoronto.ca.

STUDENT CODE OF CONDUCT
Please arrive promptly for lecture and do not forget to turn off cell phones. You are fully expected to abide by the Code of Student Conduct as set out by The Governing Council at the University of Toronto (http://www.utoronto.ca/govcncl/pap/policies/studentc.html). This document defines the standards by which students are to conduct themselves within class and within the University community at large. Please be advised that misconduct of any form will not be tolerated in this class. This includes plagiarism on quizzes, assignment, and exams, which will be strictly enforced and is easily detected. Please consult the University Calendar for information about grade distribution and academic conduct. All suspected cases of academic dishonesty will be investigated following procedures outlined in the Code of Behaviour on Academic Matters. If you have questions
or concerns about what constitutes appropriate academic behavior or appropriate research and citation methods, you are expected to seek out additional information on academic integrity from your instructor or from other institutional resources (see http://www.utoronto.ca/academicintegrity/). If you have further questions regarding what constitutes plagiarism or other academic offenses, feel free to speak with Prof. Stefanovic.

Note:

Check Blackboard regularly. All announcements, lecture notes, and midterm marks and other information will be posted on the Blackboard.

Other useful books for this course:

“Understanding Global Warming Dire Predictions” Mann, E.M. & L.R. Kump (2008), Pearson Education Canada

"Global Environmental issues": Kevin Pickering and Lewis Owen, Routledge, 389 pp.
