Welcome to Organic Chemistry part II. CHMB42 provides an introduction to compound determination using various spectroscopic methods. As well you will learn about aromatic substitution, carbonyl chemistry and biologically important compounds such as carbohydrates, and heterocycles.

Lectures: Tuesday 5-6, Wednesday 8-9 a.m., Friday 2-3 in AC223 (the ARC)

Instructors:

Wanda Restivo
Lecturing until Reading Week
but lab coordinator for whole term.
SW-639 and SW 162, 416-287-7222
restivo@utsc.utoronto.ca
office hours: Mon 1-3, Wed 2-3, Thursday 10-11 in SW639

Dr. Lana Mikhaylichenko from mid Feb until April
SW 633, 416-287-7207
mikhay@utsc.utoronto.ca

Email Policy:
Please use a valid “utoronto.ca” account for all CHMB42 correspondence. Emails received from other accounts are frequently filtered out as spam and may not be received. When composing your email, please use professional language. Be sure to include the course code as part of the subject line and sign the email with your first and last name, as well as your student ID. If it is in regards to your lab please include your practical number and the name of your TA. Your email will be answered as soon as possible (likely within 36 hours, unless it is a weekend or holiday).

A note on email content: Please double check the syllabus and course Blackboard page before emailing me with a question. The answers to most student questions can be found there! Questions regarding the lecture material/assigned readings/suggested problems should be posted on the discussion board (see below) rather than emailed. This will ensure that others can benefit from the responses provided and avoids having the same questions asked multiple times. Questions on the lab material should be directed to the lab coordinator or your TA.

Required Materials:
This is the same text you would have used in CHMB41. The text has an accompanying study guide/solutions manual which is not required, but is strongly recommended. The UTSC Bookstore sells a bundled package which includes the text, study guide/solutions manual and the Mastering Chemistry access code (see below).
Online Homework:
There will be weekly homework assignments to be completed using the online homework system Mastering Chemistry. If you purchase the bundled textbook package at the UTSC bookstore, your Mastering Chemistry registration code will be included.

If you acquire a copy of the text from another source, you will need to purchase a Mastering Chemistry code separately from the UTSC Bookstore. If not available you will have to opt out of access to mastering.

If you did not use it last term you may purchase it in the bookstore along with the study guide

The publisher’s web site at: http://pearsoncanada.ca/ includes media materials, which supplement the text. Once activated, each Mastering Chemistry Code is valid for 1 year. Instructions for setting up your account can be found on Blackboard under the “course information” tab. Once registered, you will need to enroll in the Mastering Chemistry page for this course. To do this, enter the Course ID: MCRESTIVO95758 and the course title is: B42WandaLana14W

For those of you who choose to not purchase the new text (where the online homework access comes bundled,) you may choose to opt out of the online homework and that percentage will be included into the tutorial quiz grade. See blackboard for the survey and it must be completed by January 24 or you will receive a zero for your online homework grade.

Please remember to use your 9 digit student number as your ID for the online homework.

The problem sets will be released every Friday evening and they are due the following Friday at 11 pm. First one will be due January 24th. The assignments will be equally weighted and recorded as a percentage. They will cover the material discussed in class. Late assignments will not be graded. In the final calculation the lowest mark will be dropped. The online homework counts for 3% of your final grade and can make a huge difference in helping you understand the course material and ultimately improving your grade.

Discussion Board:
An online discussion board will be maintained through Blackboard. This online space will provide you with a place to post questions related to the course material. You must post as yourself. Feel free to answer each others’ questions as well. The forums will be monitored by the instructor and/or a science engagement student to ensure that all questions are answered accurately. In addition, frequently asked questions (with their answers) may be posted here so be sure to check in periodically. Please note: Posts which contain answers/solutions to weekly homework assignments are not permitted and will be promptly removed. Note that if your final grade is on the cusp of a higher GPA threshold your active participation in the discussion board will be enough to bump you up to the next level.

Clickers:
You should have one from last term or from first year. They will be used in class so that you may participate in the questions that will be presented periodically throughout the lectures. They will not be used for credit.

Course Organization:

Lectures-
Total of 3 hours per week. The lecture schedule is a rough guide. Incomplete notes will be provided for you on Blackboard. You should print them off and bring them with you to class. You should also bring some blank paper. You will be responsible for all material covered in lecture, even if it is not included in the online notes. Assigned problems have been posted on Bb. It may seem like there are so many questions but many of them are quickly answered when going through the reading of the chapter. You will be successful in this course by doing the problems and coming for help when difficulty arises.

Online viewing:
For those students who wish to review the lecture after the fact, all CHMB42 lectures will be taped and there will be a link for ‘Lecture Cast’ from the course Blackboard page. These lectures will be kept for 2 weeks and then removed. They will not be available for exam review so make sure you keep up during the term. Forward queries to webopt@utsc.utoronto.ca.

</tr>
<tr>
<td>Feb 11-14</td>
<td>Carboxylic acid Derivatives cont’d</td>
<td>16.9-16.22</td>
</tr>
</tbody>
</table>

This is a tentative schedule. Some parts of the lecture, like naming for example, I will leave for you to go over on your own time. There are a few powerpoint slides on Bb to help you. I hope to be doing more problems in class. Some of these will be from your text but most will be from other sources.

Tutorials:

The tutorials are scheduled in the same time slot as your laboratory but in alternating weeks. You have been assigned to the tutorials based on our practical number and the room and time schedule is shown below. If you have an even numbered practical you will have your tutorial first. Even numbered practicals will have their tutorials beginning Jan 15, odd begin Jan 22

<table>
<thead>
<tr>
<th>Day</th>
<th>Time</th>
<th>Room</th>
<th>Practical Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wednesday</td>
<td>12-1</td>
<td>BV 363</td>
<td>1/3/5 , 2/4/6</td>
</tr>
<tr>
<td></td>
<td>12-1</td>
<td>PO 101</td>
<td>7/9/, 8/10/12</td>
</tr>
<tr>
<td>Thursday</td>
<td>1-2</td>
<td>MW 160</td>
<td>13/15/17, 14/16/18</td>
</tr>
<tr>

</tr>
<tr>
<td>Friday</td>
<td>11-12</td>
<td>BV264</td>
<td>25/27, 26/28</td>
</tr>
</tbody>
</table>

The tutorials will be assigned based on your lab number so you cannot sign into one. Last day for signing into a practical section will be Jan 9. Any change after that date will have to be requested of Wanda Restivo if space allows.

Attendance at the tutorials is compulsory. You will have a total of 5 tutorials. You will have a quiz at the end of the tutorial and they will count towards 2% of your final grade. To be able to write the quiz you must attend the entire tutorial. Your TA will be keeping track of your attendance. You may NOT attend a different tutorial without permission from the instructor. You will be allowed to miss one tutorial with no consequence. If you miss any more you must provide documentation for your absence and you may be required to attend a different tutorial. This will be up to the instructor.

Labs:

The laboratory component of CHMB42 is compulsory. In order to pass the course, you must also pass the lab component. The lab component is worth 25% of your overall grade.
Lab Manual and notebook:
A lab manual must be purchased from the UTSC Bookstore before your first lab. Please note that we do not print enough manuals for the students in the class in the first week since students are still “shopping” their courses. Do not wait until the last minute to purchase your manual as you may be out of luck. If this happens you will purchase the manual from the bookstore and they will be printed on request which may take up to 3 days. If you come to lab saying that you could not purchase a manual then you will not be accommodated and will receive no credit for that lab.

There are five labs and a lab test which is cumulative. It may be both written and practical. On your first day to the lab you will have to bring a copy of your WHMIS training quiz. Instructions for how to access this is given in the manual under laboratory safety. You must have received a 30/37 as a minimum grade. Your quiz is good for 3 years so you may just bring a copy of the results that you completed in either first year or CHMB41. You will not be able allowed into the lab if you do not provide this hard copy of your results to your TA. See the Blackboard course content under labs for more information.

You should continue to use the same notebook that you used for CHMB41. Many of the chemicals will be the same and you can refer back to those pages when writing new msds data. Also the techniques you learned in that course will be handy in case you need to refer back to them. NEW: You may access the internet and the University msds site called ChemWatch on the computers available in SW 164. You may use them any time during the day but you must wear safety glasses as this is still part of the laboratory space. Your msds information must be hand written, by you, in your notebook. Do not print off msds and staple it into your notebook. If you do so you will be asked to leave the lab until your msds is properly written in your notebook.

There will be lab lists posted outside the lab with your name and seat numbers. Once you hand in your scored WHMIS sheet you may proceed to that spot. You will also find Videos on techniques linked from Blackboard. These links are available in your manual.

Lab Schedule:
Odd # labs begin: Jan 15 (Even numbered labs will have a tutorial)
Even # labs begin: Jan 25 (Odd numbered labs will have a tutorial)

</tbody>
</table>

Lab Rules:
- Be punctual. There will be a quiz (10 minutes) at the beginning of every lab, including the first one.
  (The questions at the back of the experiments will not be graded and are for you to try. Similar questions may be used in the quizzes.)
- Be prepared. Msds data in your notebook as well as a flow chart of your experiment, theoretical yield (if applicable) and intro is required. Your TA will be checking your notebook before entrance to the lab. If they feel you are not prepared you will be denied entrance and you will receive a grade of 0 for this lab.
- Be there. Part of the lab mark is based on your ability to answer, with competence, the questions of the TA’s and instructors. This is a performance mark and more information is given in your manual.
- You must wear safety goggles, a lab coat and have your legs and feet covered.

Absences from the lab:
If you need to miss a laboratory period for any valid reason, you must immediately report it to Wanda Restivo, restivo@utsw.utoronto.ca, or by phone 416-287-7222. I will try to do my best to have you do a makeup lab. If it is medical you must provide me with a medical note.
http://www.utsc.utoronto.ca/~registrar/resources/pdf_general/UTSCmedicalcertificate.pdf
The doctor must state that you had moderate to severe symptoms for any makeup consideration.
Please note that students will not be allowed to re-schedule or miss labs on the days of any exams from either this or other courses. This is a Chemistry Discipline Policy.

**Term Test**

There will be one 90-100 minute term test worth 25% of your final grade sometime after Reading Week. This will be written outside of class time, time TBD. The exact date and time will be provided once the information becomes available from the registrar.

**Policy on Missed Tests:**

Should you miss the test due to a legitimate reason, you must submit appropriate documentation within 48 hours of your absence. If the reason is medical, an official UTSC medical note must be provided. (please see Absences from the lab above.) There will be a make-up exam within 1-2 weeks of the term test written at the instructors’ convenience. If you miss the makeup exam you will receive a grade of 0.

**Final Exam:**

There will be a final 3-hour, cumulative exam written during the end of semester exam period. The exact date, time and location will be announced as soon as they are available. Please note that if you miss the Final Exam, you must petition the Registrar’s Office to write a make-up exam in the next formal exam period. Check the UTSC Calendar for instructions and deadlines.

**Method of evaluation:**

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Midterm test- ( ~2 hours)</td>
<td>25%</td>
</tr>
<tr>
<td>All chapters taught before Reading week inclusive</td>
<td></td>
</tr>
<tr>
<td>Exam schedule TBA</td>
<td></td>
</tr>
<tr>
<td>Tutorials and online homework</td>
<td>2 + 3% (total of 5% if opted out of mastering)</td>
</tr>
<tr>
<td>Lab</td>
<td>25%</td>
</tr>
<tr>
<td>5 experiments and final lab test- see manual</td>
<td></td>
</tr>
<tr>
<td>*There will be no makeup for the lab test.</td>
<td></td>
</tr>
<tr>
<td>Final exam</td>
<td>45%</td>
</tr>
<tr>
<td>during final exam schedule (cumulative)</td>
<td></td>
</tr>
<tr>
<td>Extra credit- more on this later</td>
<td>Up to 3%- must having passing mark first</td>
</tr>
</tbody>
</table>

*Note that you must pass the lab and either the midterm or final exam to be eligible to pass this course. The extra credit will not be counted towards achieving a pass in the course.*

**Communication:**

All grading in this course will be on the course site on Blackboard. You should monitor your grades as they go up and you will have 2 weeks from the time they go up to check for errors. A final date will be given, after that date- no corrections will be accepted.

Lecture notes, announcements, will be found on Blackboard. Discussion groups will only be found on Blackboard. You may access it at:  
https://portal.utoronto.ca/

You should get used to checking this site frequently for any important announcements.
Academic Policy:

Academic integrity is important to maintain our community which honours the values of honesty, trust, respect, fairness and responsibility and to protect you and the value of the degree towards which you are all working so diligently

http://www.governingcouncil.utoronto.ca/policies/behaveac.htm

It is an offence for students to:

- Use someone else’s ideas or words in their own work without acknowledging that those ideas/words are not their own with a citation and quotation marks. i.e. to commit plagiarism
- Include false, misleading or concocted citations in their work.
- Obtain unauthorized assistance on any assignment
- Provide unauthorized assistance to another student. This includes showing another student completed work.
- To submit their own work for credit in more than one course without the permission of the instructor
- To falsify or alter any documentation required by the University.- eg: doctor’s notes
- To use or possess an unauthorized aid in any test or exam.

There are other offences under the Code, but these are the most common.

Please respect these rules. Offences will be dealt with according to the procedures outlined in the Code of Behaviour on Academic Matters.

Accessibility:

In this course students with diverse learning styles and needs are welcome. In particular, if you have a disability/health consideration, that may require accommodations, please feel free to approach me and/or the Access/Ability/ Services Office. I will work with you and Access/Ability /Services to ensure you can achieve your learning goals in this course. Enquiries are confidential. The UTSC access/Ability/ Services staff (located in S302), are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations
(416) 287-7560 or ability@utsc.utoronto.ca
<mailto:ability@utsc.utoronto.ca>.

Academic Advising and Career Centre- AC213 www.utsc.utoronto.ca/aacc

The wonderful people in this department are there to help you with: exam preparation and writing, writing resumes, choosing courses, creating a timeline for graduation, career research, and so much more. They also will help you find the right people to help you with your academic success.

Our hints to your success!!

- Please stay current with the material. The course is highly cumulative. Ideas introduced early on will be used to develop other concepts later. Thus, letting things slide is unwise, as the material begins to accumulate relentlessly. As the semester progresses and other demands on your time increase, playing catch-up will be harder to do. Furthermore, it is possible, indeed likely, that many of the concepts in the course will become clear only after you have had a chance to ponder them for a while. This period of reflection is critical and hence the need for time. So try not to learn everything at once. Even a half-hour of regular study each day is likely to be more useful to you than any all-night, caffeine-powered cramathons.

- Write, write, write. The importance of this cannot be overemphasized. Simply listening to the lecture, reading your text, or watching cool graphics flash by the screen is not enough. It is all too easy to lull yourself into thinking that you understand the material. Expressing your ideas clearly in writing (which is what you will have to do in the exams anyway) requires a higher level of mastery. To reach that level you must practice writing. Don’t just look at the answers in the text and think you will be able to do it the same way. Write them out and perhaps
seeing them on paper will provide clues as to where you might be going wrong. This will also help prevent memorization as you know how to work through the problem logically. Trust us on this. Write, write, write.

- Make the most of the resources available to you.

Where to get help for this course: 🙁 → 😊

1- Instructor’s office hours

2- A peer facilitator program, FSG- Facilitated Study Group is being run through the Centre for Teaching and Learning. These weekly sessions are open to all students taking this course who want to improve their understanding of course material, improve their study techniques, and improve their grade. Attendance is voluntary. In these sessions you will compare notes, discuss important concepts, develop study strategies, and prepare for exams and assignments on course material. Course material is NOT re-lectured. The FSG’s are lead by a trained facilitator who has previously taken the course. A survey will be taken during the first week of class to determine the best days and times for most students, and they will begin probably the 2nd or 3rd week of class. Any announcements will be announced in class, posted on Blackboard and also at http://ctl.utsc.utoronto.ca/home/fsg/

3- Lab Skill Seminars
   There will be lab skills seminars throughout the term. These are run by Science Engagement students. They are tentatively booked for Tuesday 6-7 in AC223 and Fridays 3-4 in TBA. Any changes will be posted on Blackboard

4- Online Discussion board on Blackboard- This the best place to ask questions related to the course as the questions will get answered quickly by your peers and the answer will get out to the most people. One of our Science Engagement students will be monitoring this forum.

5- Chem Aid Centre- volunteers will be available in the portables outside the Science wing- PO104 Room 107 to help you with any questions in course material. These are students who have taken several chemistry courses and will be able to help you with any problems. Monday – Thursday, 10 – 4 pm.

*Extra problems sessions (called Discussion Sessions) –these are scheduled for a 1-2 hour session each week and your attendance is voluntary. We will be going through extra problems either assigned or not from the text and other sources. Due to scheduling problems it may not be a time that everyone can come, therefore find a friend who can and get their notes and ask them to go over the material. These sessions will NOT be videotaped. They will start the week of Jan 21. Time requested is Monday 4-6 and room TBA

This course has a reputation for being tough which is unfounded. It IS a course that requires a lot of TIME and PRACTICE. You will be unsuccessful if you do not keep up on the material every day. This course is like building a house. If the foundation is not well built the rest will crumble. You may have to go over your material from CHMB41 over and over.

Use your text book to its fullest potential.
As soon as you are having difficulty with a problem, ask for help. We are here to help you understand organic chemistry so don’t feel shy. We want you to be successful but it all starts with YOU.

I look forward to meeting you all.

Wanda
