University of Toronto Scarborough  
Department of Physical and Environmental Sciences  
EESB02H3 S – Principles of Geomorphology  
2013 Outline  

Prof: Mandy Meriano  
Office: SW627C  Telephone: 416-208-2775  
Office hours: Tuesday 12 pm - 3 pm  
Email: mmeriano@utsc.utoronto.ca  

Lecture time: Tuesday 9 am to 11 am  
Location: BV264  

Practical times: Thursday 9:00 –11:00; 11:00 –13:00; 13:00 – 15:00; 15:00 – 17:00  
Location: SW313 and computer lab (location TBA)  
Field component of the practicals will be carried out in Highland Creek  
Emphasis is placed on practical work in this course, which will involve some time commitment. However, this is reflected positively in your final grade  

Teaching Assistant: Carlos Paulo and a second TA TBA soon  
Office and office hours: TBA on the course Portal  
Lab coordinators: Chai Chen and Tom Meulendyk, PO103, Room 122

The course textbook is available from the UTSC Bookstore.  

Description: The earth’s surface form and its dynamic behavior at range of spatial and temporal scales is an integral part of the physical, biological and human environment. It is strongly influenced by human activity, while at the same time imposing severe constraints upon that activity. The study of the earth’s surface forms and their morphodynamic behavior, both naturally and under the impact of human habitation, is the field of Geomorphology. It is the human interaction with the surface of the earth that gives rise to a number of environmental concerns: e.g., surface erosion, catastrophic floods, sea-level rise, landslides, water resources and water extraction, etc. This introductory course combines aspects of geology, climatology, hydrology, and soil science to present a coherent introduction to the surface of the Earth, with emphasis on
both fundamental concepts and practical applications, as a basis for understanding and intelligent management of the Earth's physical and chemical environment.

**Learning Objectives:** By the end of the course students will have developed a coherent understanding of the various aspects of geology, climatology, hydrology, and soil science that shape the surface of the Earth, with emphasis on both fundamental concepts and practical applications, as a basis for understanding and intelligent management of the Earth's physical and chemical environment.

**Marking Scheme (tentative):** Four practicals; value 40% (4 x 10%); flume experiment to be conducted at the Department Geography downtown: value 5%; a midterm exam: value 20%; and a final exam: value 35%.

The midterm is based on material covered in lectures and readings up to and including the class before the midterm exam. Readings will be from your course textbook: Trenhaile (2013).

The final exam will be based on all term material (including readings and lectures). Readings will be from your course textbook: Trenhaile (2013).

**Tentative Lectures**

- **Week 1: January 08**   Physics and chemistry of the Earth's surface
- **Week 2: January 15**   The solid materials of the Earth's surface
- **Week 3: January 22**   Topography
- **Week 4: January 29**   Rivers
- **Week 5: February 05**  Groundwater
- **Week 6: February 12**  Mid-term exam held during class time
  
  *February 18 – 22*    *Reading Week*

- **Week 7: February 26**  Lakes
- **Week 8: March 05**    Glaciers
- **Week 9: March 12**    Mass Wasting and deserts
- **Week 10: March 19 (to be confirmed)**  Flume visit (Department of Geography)

- **Week 11: March 26**   Coasts
- **Week 12: April 02**   Landscapes and/or Physical and chemical cycles
Plagiarism: Assignments are checked for plagiarism. Please consult the University Calendar for a discussion and outline of the policy on plagiarism and academic integrity (also see proceeding section below). The sanctions can be severe. If, after reviewing the University policy, you are uncertain about what constitutes plagiarism, talk to your course instructor.

Academic Integrity: Academic integrity is essential to the pursuit of learning and scholarship in a university, and to ensuring that a degree from the University of Toronto is a strong signal of each student’s individual academic achievement. As a result, the University treats cases of cheating and plagiarism very seriously. The University of Toronto’s Code of Behaviour on Academic Matters (http://www.governingcouncil.utoronto.ca/policies/behaveac.htm) outlines the behaviours that constitute academic dishonesty and the processes for addressing academic offences. Potential offences include, but are not limited to:

In papers and assignments:

- Using someone else’s ideas or words without appropriate acknowledgement.
- Submitting your own work in more than one course without the permission of the instructor.
- Making up sources or facts.
- Obtaining or providing unauthorized assistance on any assignment.

On tests and exams:

- Using or possessing unauthorized aids.
- Looking at someone else’s answers during an exam or test.
- Misrepresenting your identity.

In academic work:

- Falsifying institutional documents or grades.
- Falsifying or altering any documentation required by the University, including (but not limited to) doctor’s notes.

All suspected cases of academic dishonesty will be investigated following procedures outlined in the Code of Behaviour on Academic Matters. If you have questions or concerns about what constitutes appropriate academic behaviour or appropriate research and citation methods, you are expected to seek out additional information on academic integrity from your instructor or from other institutional resources (see http://www.utoronto.ca/academicintegrity/).

Please consult the University Calendar for information about grade distribution and academic conduct.

Extensions: Requests for an extension on an assignment must be tendered in writing in advance of the due date. In instances of illness, a supporting medical certificate must
be completed by a physician. Other notes are not acceptable. Extensions are granted at the discretion of the TA, and may be granted for other significant emergencies.

**Handing In Assignments:** You are responsible for making sure that your TA receives your work. Students who mail assignments in, place work on the floor outside an office, or slip assignments under a door, do so at their own risk.

**Lost or misplaced assignments:** It is your responsibility to keep a photocopy of your work, and to make more than one disk copy of your work. Excuses are not accepted in the case of lost or misplaced work.

**Accessibility:** Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodation, please feel free to approach me and/or the AccessAbility Services Office as soon as possible. I will work with you and AccessAbility Services to ensure you can achieve your learning goals in this course. Enquiries are confidential. The UTSC AccessAbility Services staff (located in S302) are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations (416) 287-7560 or ability@utsc.utoronto.ca.

Students are encouraged to review the Calendar for information regarding all services available on campus.
