

Casket Problems

In order to win a prize you must use logic to find which casket contains the prize.

There are three caskets: Gold, Silver and Bronze.

Gold

The prize is not in this casket.

The prize is a vehicle of some kind.

Silver

The prize is not in the gold casket.

The prize is some model of smart-phone.

Bronze

The prize is not in this casket.

The prize is in the silver casket.

Clue: Each casket has at most ONE false statement on it.

Where is the prize?
