

Who Won the Prize?

Albert and Barbara were describing the result of the Contest.

There were three contestants, Chris, Donald, and Elizabeth.

Barbara reported: Chris won the Contest and Donald came in second.

Albert, on the other hand, reported that Elizabeth won the Contest, while Chris came in second.

In fact, neither Barbara nor Albert had given a correct report of the results of the Contest. Each of them had given one correct statement and one false statement. What was the actual placing of the three contestants?
