

**In the land of the knights and knaves AND normals.**

**Knights always tell the truth. Knaves always lie. Normals sometimes tell the truth and sometimes lie.**

**Also, it is a law that knights can only marry knaves, and knaves can only marry knights. (So who can normals marry?)**

**You meet A, B and C. Exactly one of them is a knight, one normal and one a knave.**

**A says “I am normal”.**

**B says “That is true”.**

**C says “I am not normal”.**

**What are A, B and C?**

**You meet two individuals A and B who are a married couple.**

**A says “my spouse is not normal”.**

**B says “my spouse is not normal”**

**What A and B?**
