

Environmental Studies (Arts) (HBA)

Department of Physical & Environmental Sciences

Specialist

Major

Minor

A major in Environmental Studies focuses on the social context of and potential solutions to problems in the environment. Students will address different topics related to socioeconomics and environmental science while integrating insights from different disciplines and nurturing an interdisciplinary way of thinking. The program also includes many opportunities for experiential learning through problem-solving, case studies, team-based projects and individual research.

Complementary Programs: Major in Environmental Sciences

Make the most of your time at UTSC!

We want to help you maximize your university experience, so we've pulled together information and suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are listed. In fact, activities such as joining a student club, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study.

Check out future career opportunities and skills acquired from completing this program:

Competencies & Skills

- Critically assess, integrate and mobilize information from an interdisciplinary perspective
- Utilize relevant project management, monitoring and evaluation techniques
- Consider environmental policies and principles when engaging in environmental decision making

Careers for Graduates

- Environmental Consulting
- Private/Public Research and Development
- Government (Municipal, Regional, Provincial, Federal)
- Sustainability Management (e.g. Recycling)
- Transportation Infrastructure and Planning
- Food and Agriculture

Further Education

- Environmental Studies
- Environmental Science
- Sustainability Management
- Environmental Management
- Geography and Planning
- Forestry
