Major programs in UTSC's Department of Health and Society (DHS) promote an understanding of health across a spectrum of academic perspectives: from the clinical and biological health sciences to social science and humanistic ways of knowing. Students who choose to major in Health Policy (BA) will become experts in the structure and effectiveness of health care systems, including public health policy, health crises and management, caregiving across the life course, and pressing issues in health care delivery for marginalized communities. Special emphasis is placed on how matters of culture and identity—including race, ethnicity, gender, disability, and colonialism—directly impact health outcomes and services across Canada and in the wide world beyond.

**Complementary Programs:** Anthropology, Sociology, City Studies, History, Philosophy, Public Policy, Women's and Gender Studies, Human Geography, International Development Studies, Political Science

## Make the most of your time at UTSC!

We want to help you maximize your university experience, so we've pulled together information and suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are listed. In fact, activities such as joining a student club, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study.
