Philosophy is the study of the ideas that shape our thought and action, and it addresses fundamental questions and problems associated with reality, truth, existence, logic, and morality. Develop the intellectual abilities and techniques required to think effectively for yourself at a deeper level. Explore the ideas that underlie controversial issues in politics, morality, science, religion, art, and more. Courses cover a wide range of topics including art, ethics, feminism, politics, techniques of argument, and theories of knowledge and the mind.
