

BIOC12H: Biochemistry I: Proteins and Enzymes Fall 2019

Description

This course will cover the general structure and function of macromolecules in living organisms. However, the focus will be on the structure and function of proteins and the special class of proteins: enzymes. Analytical methods for proteins will be also discussed. Topics include: amino acids; the primary, secondary, tertiary and quaternary structures of proteins; protein motifs and domains; glycoproteins; membrane proteins; classical enzyme kinetics and allosteric enzymes; mechanisms of enzyme action.

Prerequisites: CHMB41 and [BIOB10H & BIOB11H] /BIOB10Y

Class Meetings

Monday 13:00-15:00 HW216

Wednesday 11:00-12:00 HW216

Instructor

Dr. Rongmin Zhao

Office: SY248

Email: rzhao@utsc.utoronto.ca

Please use E-mail ONLY when it is critical for you to get in touch with me and use BIOC12H-Biochemistry in the subject line. Your student name and student number must be included in your email.

Office Hours

Instructor office hours (SY248): Monday 4:00-6:00pm; or the time by appointment

Teaching Assistant

We have two teaching assistants, Zachary Kileeg and Bona Mu. Their contact information will be posted on the course website. TA monitors the online homework given in **Smartwork 5**, and the Bulletin board on **Quercus**. TA also holds office hours after quizzes and term test to answer questions and for your test viewing. The schedule of TA office hours will be announced on the course website.

Lecture Materials

The University of Toronto QUERCUS system will be used to support the course. You can log in from the website q.utoronto.ca with your UTORid. Lecture note will be posted online prior to the lecture week either Friday or Saturday. However, lecture notes only allow you to follow the lectures easily, and some materials discussed in class may not be included in lecture notes. Any important information related to this course will be announced online and you are supposed to check the announcement regularly.

Textbooks

Biochemistry by Roger L Miesfeld & Megan M McEvoy (W.W.Norton & Company). The Canadian bound paperback copies were ordered and available from the UTSC bookstore. The textbook comes with the following if you purchase a copy:

- **720 day access** to all digital resources, including the ebook, *Smartwork5 homework system*, 3D molecular, and process animations, etc...
- An **integrated student solutions manual** which will bring in over 100 pages of long form student solutions.

The purchase of the textbook is not absolutely required, but it is highly recommended. We'll use *Smartwork5 homework system* accompanied with the textbook for extra suggested questions. Smartwork 5 homework system is different from Quercus to which everyone enrolled in this course has the full access. See posted guideline on how to access and use the Smartwork 5 from the website: <https://digital.wwnorton.com/biochem>. You are required to sign up with your UofT student email address. Everyone could sign up the online homework system by choosing "I want to sign up for free trial access" which let you to access the system for 21 days. See the following evaluation section for bonus marks if finishing Smartwork 5 questions.

Alternative readings: many other biochemistry textbooks cover similar topics, and they all provide valuable explanation on protein biochemistry concepts. These textbooks include but not limited to Biochemistry: the molecular basis of life (McKee and McKee); Biochemistry (Voet et al.); Biochemistry (Berg et al.); Principles of Biochemistry (Horton or Moran et al.); Biochemistry (Garrett et al.)

However, **ONLY** materials covered in class or those assigned for reading will be tested.

Course Evaluation

There are 3 in-class quizzes, one term test and final examination; all are close book.

Quizzes (20%)

Term test (30%)

Final examination (50%)

Smartwork 5 homework: 5% (Bonus)

All quizzes/tests/exams focus on concepts and the mechanism of processes. The test may include calculation and graphing questions, explanation of processes and interpretation of terms.

Quizzes (20%): three in-class quizzes, only the best two will be used and each worth 10%. Multiple choice and true/false questions. The approximate time to have the quizzes are indicated in the table at the end but could be changed by the instructor. The length of the quizzes varies and could be 30-50min. **No makeup quizzes.** If you miss one, the other two will each weigh 10% for a total of 20%. If you miss two, you can only get a maximum of 10% for the quizzes.

Term Test (30%): schedule will be arranged by the registrar office. Multiple choice and short answer questions. There is no makeup for term tests. If you miss a term test due to sickness, you have to contact the Departmental Undergraduate Coordinator (**Jennifer Campbell**,

jacampbell@utsc.utoronto.ca) and she will determine whether you have the legitimate cause to miss the test. If you have a valid reason to miss term test, the 30% will be combined to the final exam.

Final examination (50%): schedule will be arranged by the registrar office. Multiple choice and short answer questions.

Note: Because suggested Smartwork questions are bonus only, there is no makeup or any policy to grade late submission. Unfinished Smartwork questions by due date, for whatever reason, will not be marked or recorded.

Information Regarding AccessAbility Services at UTSC

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, please feel free to contact with me and/or the AccessAbility Services Office as soon as possible. The UTSC AccessAbility Services staff (located in Room SW-302) are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations. You can contact AccessAbility Services at 416-287-7560 or ability@utsc.utoronto.ca.

Academic Integrity

Academic integrity is essential to the pursuit of learning and scholarship in a university, and to ensuring that a degree from the University of Toronto is a strong signal of each student's individual academic achievement. As a result, the University treats cases of cheating and plagiarism very seriously. The University of Toronto's Code of Behaviour on Academic Matters (<http://www.governingcouncil.utoronto.ca/policies/behaveac.htm>) outlines the behaviours that constitute academic dishonesty and the processes for addressing academic offences. Potential offences include, but are not limited to:

- **IN PAPERS AND ASSIGNMENTS:** Using someone else's ideas or words without appropriate acknowledgement; submitting your own work in more than one course without the permission of the instructor; making up sources or facts. Obtaining or providing unauthorized assistance on any assignment.
- **ON TESTS AND EXAMS:** Using or possessing unauthorized aids; looking at someone else's answers during an exam or test; misrepresenting your identity.
- **IN ACADEMIC WORK:** Falsifying institutional documents or grades; Falsifying or altering any documentation required by the University, including (but not limited to) doctor's notes.

All suspected cases of academic dishonesty will be investigated following procedures outlined in the Code of Behaviour on Academic Matters. If you have questions or concerns about what constitutes appropriate academic behaviour or appropriate research and citation methods, you are expected to seek out additional information on academic integrity from your instructor or from other institutional resources (see <http://www.utoronto.ca/academicintegrity/resourcesforstudents.html>).

Tentative Lecture Schedule

Topics covered are listed below. This is a tentative schedule and the order may be changed later. Lecture notes will be posted weekly.

Lecture weeks	Monday of the Week	Topics	note
1	Sept 2	Introduction, basics of biochemistry, water, buffer, pH control, thermodynamics	First class on Sept 4th. Please double check your prerequisite for this course
2	Sept 9	Amino acids, protein primary structure	Sept 16, last day to adjust course load
3	Sept 16	Protein secondary structures	
4	Sept 23	High orders of protein structures	Quiz 1
5	Sept 30	High order of protein structures, protein analysis	
6	Oct 7	Protein folding and diseases	
	Oct 14	Reading week (No class)	Oct 14-Thanksgiving Day and reading week.
7	Oct 21	Important proteins	Term test 1
8	Oct 28	Carbohydrate and glycoprotein	
9	Nov 4	Lipid and membrane proteins	Quiz 2
10	Nov 11	Enzyme kinetics	Nov 18, last day to drop F courses without academic penalty
11	Nov 18	Mechanism of action of Enzymes	Quiz 3
12	Nov 25	Regulation of enzyme activity	
13	Dec 2	Last class for this course	Dec 2 Monday, last class
	Dec 3-5	Study break	
	Dec 6-21	Examination period	Final exam is cumulative
