- **Level of Accessibility**
  - A - Accessible and exposed to all occupants of the building.
  - B - Accessible only to maintenance staff and exposed to view without moving.
  - C - Accessible only to maintenance staff and concealed from view due to a barrier.
- **Level of Action Required**
  - 1 - Immediate clean-up of fallen ACM/debris likely to be disturbed.
  - 2 - Perform asbestos removal/repair for compliance with the regulations.
  - 3 - Sample representative to a visually similar homogeneous sample material.
  - 4 - Move the area.
- **ACM** - Asbestos-Containing Material
- **SA#** - Sample representative
- **N/A** - Not applicable.
- **Friability**
  - YES - Friable
  - NO - Non-friable

**Level of Accessibility**
- A - Accessible and exposed to all occupants of the building.
- B - Accessible only to maintenance staff and exposed to view within room.
- C - Accessible only to maintenance staff and concealed from view due to a barrier.

**Level of Action Required**
1 - Immediate cleanup of material. ACM debris likely to be disturbed.
2 - Reform asbestos removal/repair for compliance with the regulations.
3 - Formulate a plan for removal of ACM debris to be submitted.
4 - Regular inspection/rewall ACM for compliance with regulations.
N/A - Not applicable.

**Definitions**
- ACM - Asbestos-Containing Material
- SA - Sample representation
- ACM - Sample representative
- FACILITIES TO REPAIR - DAMAGED FABRICATIONS-NON-ACM DETECTED IN BOTH TILE AND MASTIC

**Sampled by Maple in 2018 (Maple Project #16733). To view project specific report, see facilities and/or health and safety.

**Level of Accessibility**
- A - Accessible and exposed to all occupants of the building.
- B - Accessible to maintenance staff and exposed to view without moving.
- C - Accessible only to maintenance staff and concealed from view due to a build.
- D - Concealed from view due to a build.
- E - Concealed and exposed to only maintenance staff.

**Level of Action Required**
- 1 - Immediate (let in place) ACM/detrivs likely to be disturbed.
- 2 - Perform asbestos removal/repair for compliance with the regulations.
- 3 - Sample representation required to enter area.
- 4 - Regular inspection/surveillance of ACM for compliance with the regulations. NO - None detected

**Definitions**
- ACM - Asbestos-Containing Materials
- S - Sample representation
- X - Material has been previously sampled by others and was found not to contain asbestos. However additional sampling is recommended.

**Level of Accessibility**
- A - Accessible and exposed to all occupants of the building.
- B - Accessible to maintenance staff and exposed to view without moving or removing a load.
- C - Accessible only to maintenance staff and concealed from view due to a load.
- D - Accessible only to maintenance staff and concealed from view due to a load and access is required to enter area.

**Level of Action Required**
1. Immediate clean-up of fallen ACM/debris likely to be disturbed.
2. Perform asbestos removal/repair for compliance with the regulations.
3. Remove ACM sample to a visually similar homogeneous sample material.
4. Regular inspection and surveillance of ACM for compliance with the regulations. No ACM detected.
5. Sample representative of a visually similar homogeneous sample material.
6. Not applicable.

**Definitions**
- ACM - Asbestos-Containing Materials
- S - Sample representative
- N/A - Not applicable.

**Definitions**
- ACM - Asbestos-Containing Material
- SUSPECT - Suspect
- A/C - Accessible to maintenance staff andCommented from view due to a block
- SUSPECT - Sample representative to a visually similar homogeneous sample material
- Immediate clean-up of ACM/Debris likely to be disturbed
- No - None detected
- R - Room recently renovated - all ACM removed

**Level of Accessibility**
- A - Accessible and exposed to all occupants of the building.
- B - Accessible only to maintenance staff and exposed to view without moving.
- C - Accessible only to maintenance staff and Commented from view due to a block.

**Level of Action Required**
- 1 - Immediate clean-up of ACM/Debris likely to be disturbed.
- 2 - Reperform asbestos removal/repair for compliance with the regulations.
- 3A - Sample representative to a visually similar homogeneous sample material.
