"CONTAMINANTS HYDROGEOLOGY"
(EESD02 H3-S L30)

Instructor: Dr. Silvija Stefanovic

Lectures on Bb Collaborate: Mon. 7-10pm; Synchronous;
Office hours on Bb Collaborate: Thu. 4-5 pm
Email: silvija.stefanovic@utoronto.ca

TAs: Sayuri Sagisaka

Office hours on Bb Collaborate: TBA
Emails: sayuri.sagisaka@mail.utoronto.ca

The intent of the course:
Natural hydrochemical processes; the use of major ions, minor ions, trace metals and environmental isotopes in studying the occurrence and nature of groundwater flow. Point and non-point sources of groundwater contamination and the mechanisms of contaminant transport.

Prerequisite: At least 1 full credit in Environmental Science at the C-level.

Suggested Readings:

Lectures:
This course is Online Synchronous, which means it requires online attendance at a specific time (Mon. 7-10 pm) for some or all course activities and does not require attendance at a specific location for any activities. All lectures will be recorded and made available for review at your convenience. The lectures will remain posted until the end of the semester. The lecture slides will be posted in *.pdf format on the Quercus. You will require Adobe Reader to open the files (available free of charge at www.adobe.com).

Course email policy:
Email is not an effective way of teaching and email inquiries regarding course materials will not be answered. Dr. Stefanovic will be available during designated online office hours to answer questions regarding course material. If you have questions, please see the instructor during office hours – this time is for you so please do not hesitate to use it. TA will also be available during the designated online office hours and will respond to the emails pertaining assignments.

Grading:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignments (3)</td>
<td>35% (10+15+10 %)</td>
</tr>
<tr>
<td>Seminar</td>
<td>15%</td>
</tr>
<tr>
<td>Final Examination</td>
<td>50%</td>
</tr>
</tbody>
</table>

Assignments:
You will have three calculation assignments (individual or in pairs - a maximum of 2 students per group) during the term. You will be able to access the problem sheets on the Quercus at the times detailed below. More details on the assignments will be circulated during the term.
Topic
Assignment #1
Assignment #2
Assignment #3

On Quercus
Feb.1st
Feb.22nd
Mar.8th

Submission Due
Feb.22nd
Mar.8th
Mar.22nd

Seminar:
The seminars will start on Feb. 1st and will take place every week after the lecture. Two groups of two students in each group will be assigned a specific subsection of the studied major contaminant hydrogeology area to present. Please sign in for Groups on Quercus. The presentation schedule is below:

<table>
<thead>
<tr>
<th>Group #</th>
<th>Topic</th>
<th>Week #</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Group 1, 2</td>
<td>Contaminated groundwater flow</td>
<td>Week 4</td>
<td>February 1</td>
</tr>
<tr>
<td>Group 3, 4</td>
<td>Capture Curve Analysis</td>
<td>Week 5</td>
<td>February 8</td>
</tr>
<tr>
<td>Group 5, 6</td>
<td>Contaminant Transport in Aquifer I</td>
<td>Week 6</td>
<td>February 22</td>
</tr>
<tr>
<td>Group 7, 8</td>
<td>Contaminant Transport in Aquifer II</td>
<td>Week 7</td>
<td>March 1</td>
</tr>
<tr>
<td>Group 9, 10</td>
<td>Contaminant Partitioning in the Subsurface Environment</td>
<td>Week 8</td>
<td>March 8</td>
</tr>
<tr>
<td>Group 11, 12</td>
<td>Abiotic and Biotic Contaminant Transformations in Subsurface Waters</td>
<td>Week 9</td>
<td>March 15</td>
</tr>
<tr>
<td>Group 13, 14</td>
<td>Isotope Hydrology and Applications in Hydrogeology</td>
<td>Week 10</td>
<td>March 22</td>
</tr>
<tr>
<td>Group 15, 16</td>
<td>Climate Change Impacts on Groundwater Quality</td>
<td>Week 11</td>
<td>March 29</td>
</tr>
<tr>
<td>Group 17, 18</td>
<td>Innovations in Contaminant Hydrology Field</td>
<td>Week 12</td>
<td>April 5</td>
</tr>
</tbody>
</table>

Each group will need to select ONE research papers from the list Dr. Stefanovic provided on Quercus, to review and to prepare a short PowerPoint presentation (15 min) of these findings. Both groups will present the paper on the same topic so communication between the groups is required to avoid overlapping in the paper selection. The presentations will be on Bb Collaborate and a properly working camera and microphone are required. The groups have to send their slides in pdf format to Dr. Stefanovic by Monday at 6:45 pm on the day they are presenting. After the presentations, the groups should initiate discussion on the assigned topic and ask each other at least 4 questions in total (each student one question minimum). These questions should be related to the presented papers. The questions will be marked too.

Final Exam:
The 2.5-hour final examination is worth 50% of the final grade for the course. It will be a combination of figure labelling, short answer questions and calculations. The final exam will draw from the assignments, lectures and includes lecture notes and any material presented in the classroom. Information from the suggested readings, seminars and other resources not directly covered in class will not be tested on exams. More details about the exams will follow. The final exam is closed book. In order to uphold the integrity of this course during this time, we will request that you each fill out and submit a Final Exam Take Home Honour Pledge. The completion of the pledge is mandatory and not submitting it on time will be considered as an Academic Integrity Violation issue and students’ names will be sent to the Departmental Chair (DPES) for assessment.

Accessibility Statement:
Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, please feel free to approach me and/or the AccessAbility Services Office as soon as possible. I will work with you and AccessAbility Services to ensure you
can achieve your learning goals in this course. Enquiries are confidential. The UTSC AccessAbility Services staff are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations. (416) 287-7560 or ability@utsc.utoronto.ca.

Other Course Policies:
Late assignments and seminars will not be accepted and assigned a grade of zero. Extensions will be granted ONLY with a medical note or under exceptional circumstances. Your Dr. Stefanovic and TA must be informed about that immediately and documentation has to be provided within 3 days after the due date of the assignment.

Plagiarism will not be tolerated. Each student/group is expected to submit individual work for grading. It is an academic offence to plagiarize and those who do will be subjected to University procedures (see the University calendar).

Lecture topics:
1. Introduction, ground rules, expectations and course structure.
   Introduction to Contaminant Hydrogeology;
2. Types and sources of the contamination; Groundwater Chemistry  Jan.18th
3. Principles of Groundwater Flow
4. Capture Curve Analysis
   Assignment #1 – Tutorial  Feb.1st
5. Contaminant Transport: Transport of passive and reactive contaminants;
   One-dimensional soil column Advection-Dispersion Equation (ADE)  Feb.8th

FAMILY DAY (University closed)  Feb.15th

6. Contaminant Transport: Two-dimensional Advection-Dispersion Equation for instantaneous input;
   One- and Three-dimensional Advection-Dispersion Equation for continuous input
   Assignment #2 – Tutorial  Feb.22nd
7. Contaminant Partitioning in the Subsurface Environment  Mar.1st
8. Problem Set (Tutorial)
   Assignment #3 – Tutorial  Mar.8th
9. Abiotic and Biotic Contaminant Transformations in Subsurface Waters  Mar.15th
10. Isotope Hydrology and Applications in Hydrogeology  Mar.22nd
11. Climate Change Impacts on Groundwater Quality  Mar.29th
12. Course Review; Final exam preparation  Apr. 5th
