

"MICROBIAL BIOGEOCHEMISTRY"
(EESC30H3)

Instructor: Dr. Silviya Stefanovic

Lecture: Friday 1–3pm; HW214

Office: SW-648

Office hours: Monday 6-7pm
Friday 3-4pm

Email: silviya.stefanovic@utoronto.ca

Phone: 416-287-7245

TA: Stephanie Gagliardi
Veronika Shirokova

Tutorials:

TUT0001: Tue. 11-1pm, BV260

TUT0002: Tue. 9-11am, AA209

Office: TBA

Office hours: TBA

Email: TBA

Intent of the course:

This course examines the diversity of microorganisms, their adaptations to special habitats, and their role in the ecosystem and geochemical cycling. Other topics include microbial phylogeny, physiological diversity, species interactions and state of the art methods of detection and enumeration.

Prerequisite: CHMA10H3 & CHMA11H3 & BIOB50H3 & BIOB51H3

Exclusion: (BGYC55H3)

Breadth Requirement: Natural Sciences

Suggested reading:

“Bacterial biogeochemistry : the ecophysiology of mineral cycling”, T. Fenchel, G.M. King, T.H. Blackburn, 2012, 3rd Edition. London : Elsevier/AP.

Lecture notes:

The lecture slides will be posted in *.pdf format on the Blackboard. You will require Adobe Reader to open the files (available free of charge at www.adobe.com).

Course email policy:

Email is not an effective way of teaching and email inquiries regarding course materials will not be answered. Dr. Stefanovic will be available during designated office hours to answer questions regarding course material. Teaching assistant will be available during specified office hours to answer questions pertaining to the term assignment and seminar. If you have questions, then please see instructors during office hours – this time is for you so please do not hesitate to use it.

Grading:	Assignments (2):	20% (10% each)
	Seminar	15%
	Participation	5%
	Midterm	25%
	Final Examination	35%

Assignments:

You will have two individual assignments during the term, each worth 10% of the final grade. You will be able to access the problem sheets on the Blackboard at the times detailed below. The second week of the tutorial, for each assignment, you will need to complete microorganism identification exercise. The assignments are due during the tutorials at the dates detailed below. More details on the assignments will be circulated during the weekly tutorial sections which will start on of Jan 21th.

<i>Topic</i>	<i>On the Blackboard</i>	<i>Submission Due</i>
Assignment #1	Jan .21th	Feb.4th
Assignment #2	Mar. 18th	Apr. 1st

Seminar:

Teams of maximum two students will need to review ONE recent research paper (from the last 10years) on the following topic: Environmental conditions and microbes. Students need to prepare a short power point presentation (about 15 min long) of these findings. The chosen articles have to be pre-approved by your TA. Your TA will organize the seminar presentation schedule and instruct you on format and content guidelines in tutorial on Feb.4th. The presentations will take place during the tutorials on Feb. 11th, Feb. 25th, Mar.4th and Mar.11th. The rest of student will need to submit hand written summery of the presentations for participation mark.

Midterm:

The 2 hours IN-CLASS midterm examination will worth 25% of the final grade for the course. It will be a combination of multiple choice, true-false choice, "fill-in-the-blanks "and short answer questions and will cover Lectures 1-4.

The midterm will draw from lectures and assignments and includes lecture notes and *any* material presented in the classroom. Information from the readings and other resources not directly covered in class will not be tested on exams. More details about the exams will follow.

Final Exam:

The 2 hours final examination will worth 35% of the final grade for the course. It will be a combination of multiple choice, true-false choice, "fill-in-the-blanks "and short answer questions and cover lectures 5-10.

The final exam will draw from lectures and assignments and includes lecture notes and *any* material presented in the classroom. Information from the readings and other resources not directly covered in class will not be tested on exams. More details about the exams will follow. *The final exam is NOT cumulative.*

Other Course policies:

Tutorials are MANDATORY. In a case of absence you need to provide you TA with appropriate documentation.

Late assignments will not be accepted and assigned a grade of zero. *Extensions will be granted ONLY with medical note or under exceptional circumstances. Your TA must be informed about that immediately.*

Plagiarism will not be tolerated. Students are expected to submit **individual work** for grading. It is an academic offense to plagiarize and those who do, will be subjected to University procedures (see the University calendar).

Lecture topics:

1. Introduction, ground rules, expectations and course structure. Concept of microbial biogeochemistry; Microbial ecology	Jan. 10 th
2. Microbial metabolism and energy production	Jan. 17 th
3. Interactions among microbial populations	Jan. 24 th
4. Interactions between microbes and plants	Jan.31 st
5. Midterm	Feb. 7 th
6. Microbes in terrestrial environment	Feb.14 th
7. READING WEEK	Feb.21 st
8. Microbes in aquatic environments	Feb. 28 st
9. Microbes in extreme environments	Mar.7 th
10. Biogeochemical cycling of carbon, nitrogen and sulphur	Mar. 14 th
11. Biodegradation of organic pollutants	Mar. 21 st
12. Biodegradation of inorganic pollutants (metals)	Mar. 28 th
13. Course review; Final exam preparation	April 4 th

I will follow this schedule as closely as possible, but things being what they are, some of these topics may "overflow" over into other time slots.

Associated Readings in suggested book:

Week 1 - Lec 1- Ch. 1

Week 2 - Lec 2- Ch. 1

Week 3 - Lec 3- lecture notes

Week 4 - Lec 4- Ch. 9

Week 5 - Midterm

Week 6 - Lec 5- Ch. 6

Week 7- **READING WEEK**

Week 8 - Lec 6- Ch. 7

Week 9 - Lec 7- Ch. 8

Week 10 - Lec 8- 4, 11

Week 11- Lec 9- Ch. 3

Week 12 - Lec 10- lecture notes
