

EESD15H3 - CLEANING UP OUR MESS: REMEDIATION OF TERRESTRIAL AND AQUATIC ENVIRONMENTS

-2009-10-

Instructor: Dr. Silvija Stefanovic

Office: PO103 room#102

Email: silvija.stefanovic@utoronto.ca

Dr. Stefanovic Office hours: Friday 3-5pm.

LECTURE: Fridays from 12-3pm in room BV 264 (schedule of topics & readings on pg 2)

COURSE DESCRIPTION

This course consists of a study of the ways in which hazardous organic and inorganic materials can be removed or attenuated in natural systems. The theory behind various technologies, with an emphasis on bioremediation techniques and their success in practice. An introduction to the unique challenges associated with the remediation of surface and ground water environments, soils, marine systems, and contaminated sediments.

COURSE PREREQUISITES

Students must have successfully completed BGYA01H & BGYA02H & CHMA10H & CHMA11H & PHYA10H or PHYA11H

TEXTBOOK

"Fundamentals of Site Remediation" by John Pichtel, 2007, The Scarecrow Press, Inc.
This text is available from the UT Scarborough bookstore.

GRADE BREAKDOWN:

Presentation (Types of contaminants):	15%
Final Project (Case study):	25%
Project presentation	10%
Final Examination:	50%

LECTURE NOTES

The lecture slides will be posted in *.pdf format on the intranet. You will require Adobe Reader to open the files (available free of charge at www.adobe.com).

FINAL EXAM

The final exam will draw from lectures and student's presentations and includes lecture notes and *any* material presented in the classroom. Information from the textbook and other resources not directly covered in class or in the practical will not be tested on exams. More details about the exams will follow.

COURSE EMAIL POLICY

Email is not an effective way of teaching and email inquiries regarding course materials will not be answered.

Dr. Stefanovic will be available during designated office hours to answer questions regarding course material. If you have questions, then please see instructor during office hours – this time is for you so please do not hesitate to use it.

LECTURE SCHEDULE

Date	Topic	Associated Readings in Textbook
September 11 th	Course orientation Introduction to Soil and Groundwater Remediation	Lecture notes
September 18 th	Basic Soil and Groundwater Properties (review)	Lecture notes Chapter 1&4
September 25 th	Environmental Site Assessment	Lecture notes Chapter 5
October 2 nd	Student's presentations (Types of Contaminants)	Handouts Chapter 2&3
October 9 th	Groundwater Remediation: Introduction and Investigative methods	Lecture notes Chapter 5
October 16 th	Groundwater Remediation: Physical Methods; Ex-Situ Technologies; In-Situ Technologies. Case Histories	Lecture notes Chapter 6&10
October 23 rd	Groundwater Remediation: DNAPLs Remediation Methods; LNAPLs Remediation Methods. Case Histories	Lecture notes only
October 30 th	Soil Remediation: Phytoremediation, In-situ and Ex-situ Thermal Treatments. Case Histories	Lecture notes Chapter 12
November 6 th	Soil Remediation: Chemical and Biological Reaction Solidification and Stabilization Case Histories	Lecture notes Chapter 8&11
November 13 th	Soil Remediation: Soil Vapor Extraction; Soil Washing and Solvent Extraction. Case Histories	Lecture notes Chapter 7&9
November 20 th	Student's presentations (Case studies)	
November 27 th	Student's presentations (Case studies) Final Review	

I will follow this schedule as closely as possible, but things being what they are, some of these topics may "overflow" over into other time slots.
