

EESD09H3/D10Y3 Research Project in Environmental Science Syllabus

Course Description:

The design, implementation, and reporting of a substantial research project involving laboratory and/or fieldwork. Existing faculty research allows a broad range of possible topics. The course should be undertaken after the end of the 3rd Year, subject to faculty availability. Faculty permission and supervision is required; open only to those students who have either completed or are undertaking specialist courses in the area of intended study. Students having a B+ or higher standing may be eligible for summer financial support from research projects. Permission of the co-ordinator must be obtained.

Prerequisite: EESC15H3

Evaluation

Proposal (written)	30%
Proposal (oral)	10%
Final Report (written)	50%
Final Report (oral)	10%

No text book has been assigned to this course. Meetings with research supervisor will occur as needed. Final report (oral) will take place during the last week of classes.
