## Mechanics: From Oscillations to Chaos PHYB54 Winter 2018

#### Professor Hanno Rein

E-mail hanno.rein@utoronto.ca

Website http://rein.utsc.utoronto.ca

Office SW 504 C, for office hours check the iPad at the door

**Textbooks** The lectures will closely follow the textbook Classical Mechanics by John R. Taylor.

The library has several copies on course reserve.

**Lecture** Thursdays

12:00 - 14:00 HW 215

You are allowed to use electronic devices such as laptops and phones in class. However, to minimize the impact on other students, everyone who using a laptop or phone in class should sit on the right side of the room (as seen from the students' perspective).

Note that although this lecture occurs during lunchtime, eating lunch during the lecture is not acceptable.

Tutorial Wednesdays

12:00 - 13:00 IC320

**Assignments** Roughly each week, you will be given a problem set at the end of the lecture or the

end of the tutorial. The deadline for submissions is the following week on Monday at noon. This is a hard deadline. We will discuss the problems the following day in the tutorial. The problems will closely follow the course material and are designed

to prepare you for the quizzes and the exams.

You may work in groups to solve the problems but you need to hand in your own

set of answers. Photocopying and copy-and-pasting is not sufficient.

Most importantly, if you submit an answer, you need to understand it. Be prepare to present your answer at the blackboard during the tutorial. Failure to be able to present a submitted (and correct) answer will nullify all answers to the

week's problem set.

Quizzes You will write many small quizzes both during the lectures and the tutorials. You

are therefore stongly encouraged to be on time.

#### **Final Exam**

The final exam will take place during the exam period. The exam may include, but is not restricted to, material from all lectures and all tutorials. You can use a non-programmable calculator.

#### Grading Scheme

The final grade will be calculated as follows:

Assignments 20 points Quizzes 20 points Midterm 20 points Final exam 40 points

#### Absences

In the case of a problem that supports an absence to a tutorial or quiz, or an inability to hand in a problem set before the tutorial session, your grade will be calculated on the basis of all other tutorial work. Valid and official supporting documentation must be submitted within five business days of the missed tutorial or quiz.

#### Accessibility

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, please feel free to approach me and/or the AccessAbility Services Office as soon as possible. I will work with you and AccessAbility Services to ensure you can achieve your learning goals in this course. Enquiries are confidential. The UTSC AccessAbility Services staff (located in SW302) are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations (416) 287-7560 or ability@utsc.utoronto.ca.

# Academic Integrity

Academic integrity is one of the cornerstones of the University of Toronto. It is critically important both to maintain our community which honours the values of honesty, trust, respect, fairness and responsibility and to protect you, the students within this community, and the value of the degree towards which you are all working so diligently. Detailed information about how to act with academic integrity, the Code of Behaviour on Academic Matters, and the processes by which allegations of academic misconduct are resolved can be found online: http://www.artsci.utoronto.ca/osai/students.

According to Section B of the University of Toronto's Code of Behaviour on Academic Matters (http://www.governingcouncil.utoronto.ca/policies/behaveac.htm) which all students are expected to know and respect, it is an offence for students to:

- To use someone else's ideas or words in their own work without acknowledging that those ideas/words are not their own with a citation and quotation marks, i.e. to commit plagiarism.
- To include false, misleading or concocted citations in their work.
- To obtain unauthorized assistance on any assignment.
- To provide unauthorized assistance to another student. This includes showing another student completed work.
- To submit their own work for credit in more than one course without the permission of the instructor.
- To falsify or alter any documentation required by the University. This includes, but is not limited to, doctor's notes.

• To use or possess an unauthorized aid in any quiz or exam.

Specifically to this course, please be reminded that you need to understand every solution that you submit. If you work together on an assignment, you still have to be able to present your submission.

There are other offences covered under the Code, but these are by far the most common. Please respect these rules and the values which they protect. Offences against academic integrity will be dealt with according to the procedures outlined in the Code of Behaviour on Academic Matters.

### Tentative Class Schedule

Dates	Tutorial (Wednesday)	Lecture (Thursday)
Jan 11	No tutorial	Newton's Laws of motion
		Chapter 1
Jan 18	Project	Projectiles and Charged Particles
		Chapter 2
$\overline{\text{Jan } 25}$	Assignment 1	Momentum and Angular Momentum
		Chapter 3
Feb 1	Assignment 2	Energy
		Chapter 4
Feb 8	Assignment 3	Öscillations
		Chapter 5
Feb 15	Assignment 4	Oscillations
		Chapter 5
Feb 22	Assignment 5	Reading Week
$\overline{\text{Mar }1}$	Midterm	Project
Mar 8	Midterm discussion	Central Force Problems
		Chapter 8
Mar 15	Assignment 6	Coupled Oscillators
		Chapter 11
$\mathrm{Mar}\ 22$	Assignment 7	Chaos
		Chapter 12
Mar 29	Assignment 8	Chaos
		Chapter 12
Apr 5	Project	TBD
	Jan 11  Jan 18  Jan 25  Feb 1  Feb 8  Feb 15  Feb 22  Mar 1  Mar 8  Mar 15  Mar 22  Mar 29	Jan 11         No tutorial           Jan 18         Project           Jan 25         Assignment 1           Feb 1         Assignment 2           Feb 8         Assignment 3           Feb 15         Assignment 4           Feb 22         Assignment 5           Mar 1         Midterm           Mar 8         Midterm discussion           Mar 15         Assignment 6           Mar 22         Assignment 8
