Written Comprehensive Rating Scale

To ensure consistency, reviewers must adhere to the following rating scale:

Descriptor	Range	Definition
Outstanding	4.5 – 4.9	The application excels in most or all relevant aspects. Any short-comings are minimal.
Excellent	4.0 – 4.4	The application excels in many relevant aspects, and reasonably addresses all others. Certain improvements are possible.
Good	3.5 – 3.9	The application excels in some relevant aspects, and reasonably addresses all others. Some improvements are necessary.
Fair	3.0 – 3.4	The application broadly addresses relevant aspects. Major revisions are required.
Poor	0.0 – 2.9	The application fails to provide convincing information and/or has serious inherent flaws or gaps.
