This course has an in-class lecture section (LEC01) and an online lecture section (LEC60). Both sections have in-person Term Tests and/or Final Exams. LEC60 is online. To find out more about online courses [Click Here](#).

Please be assured that all students enrolled in a Lecture will be accommodated in a practical. The number of practicals currently open in some Fall/Winter courses do not accommodate all students presently enrolled in them. This is deliberate because enrolment patterns change between now and the start of the term. When the term starts, if necessary, we will open additional practicals to accommodate the students enrolled in the course at that time.

For changes to BIOA01H3F practicals after September 17, 2018, please see Karolyn Keir in Room SW238.
 All practicals complete an outdoor field trip between **September 4-21**
 Odd-numbered practicals begin labs during **week of September 10-14**

Information

Please be assured that all students enrolled in a Lecture will be accommodated in a practical/tutorial. The number of practicals/tutorials currently open in some Fall/Winter courses do not accommodate all students presently enrolled in them. This is deliberate because enrolment patterns change between now and the start of the term. When the term starts, if necessary, we will open additional practicals/tutorials to accommodate the students enrolled in the course at that time.

CHMA10H3F - Introductory Chemistry I: Structure and Bonding

Information

All CHMA10H3 F PRACTICALS WILL BE CLOSED AS OF **3:00pm on Thursday September 6th**. Please see Scott Ballantyne in SW 155C to make practical changes.

Odd numbered practical groups have their first lab during the week of **September 10th**.

Even numbered practical groups have their first lab during the week of **September 17th**.

DO NOT attempt to adjust your lab practical via the online system after September 6th - attempting to do so will result in your forfeiting your current lab spot and the system will be unable to enroll you in another lab section essentially leaving you without a lab group. After September 6th please contact Dr. Ballantyne for lab practical changes.

POLD41H3S - Advanced Topics in Politics

Information

This course surveys the work of German legal theorist Carl Schmitt (1888-1985). Schmitt is a complicated, intellectually imposing and ultimately troubling figure. His criticisms of liberalism and parliamentary democracy, and insights into sovereignty, political enmity and international law, are original, bracing and still highly relevant. Yet, Schmitt was also an ardent anti-Semite and member of the Nazi Party. We will read several of Schmitt’s books carefully, to better understand his scholarly contributions and how they relate back to his deeply flawed political orientations and affiliations. The course will be of particular interest to students of political theory, public law, and international relations.
