  *Or Equivalents

Economics for Management Studies
– Minor program
Pick one of the following:
  - MGEA01H3 – Introduction to Microeconomics
  - MGEA02H3 – Introduction to Microeconomics: A Mathematical Approach

Pick one of the following:
  - MGEA05H3 – Introduction to Macroeconomics
  - MGEA06H3 – Introduction to Macroeconomics: A Mathematical Approach

Elective Courses
Once you have selected courses to fulfill your first year program requirements, it’s time to think about electives to fill up your schedule. Electives are an essential part of your undergraduate studies, and are requirements for your overall University of Toronto degree.

Determine How Many Courses You Will Take in First Year

Your program requirements as a first year student will not be enough to fill your timetable. A standard course at UTSC is 0.5 credits.

A full-time student can take between 1.5 – 2.5 credits. This is equivalent to three, four, or five courses per semester. A student who wishes to complete their undergraduate degree in four years should aim to complete 5.0 credits in the Fall and Winter semester. You may also choose to reduce your course load, and take courses in the Summer semester. Find a balance that’s right for you.

Track your academic progress online with Degree Explorer
