Getting Ready for Your First Year

First year courses are designed to offer you core foundational knowledge that will prepare you for your second year at UTSC. Follow the first year course enrolment guide for your first year at the University for Toronto Scarborough.

Food Studies – Minor program

☐ FSTB01H3 – Introduction to Food Studies

In preparation for your second year courses in the Food Studies Minor program, you may wish to enrol in the prerequisite courses in order to take the following B-level courses for this program:

☐ EESB16H3 – Feeding Humans – The Cost to the Planet
  Prerequisites: BIOA01H3 & BIOA02H3

☐ BIOB38H3 – Plants and Society
  Prerequisites: BIOA01H3 & BIOA02H3

☐ ANTB64H3 – The Anthropology of Food
  Prerequisites: ANTA02H3

Elective Courses

Once you have selected courses to fulfill your first year program requirements, it’s time to think about electives to fill up your schedule. Electives are an essential part of your undergraduate studies, and are requirements for your overall University of Toronto degree.

Determine How Many Courses You Will Take in First Year

Your program requirements as a first year student will not be enough to fill your timetable. A standard course at UTSC is 0.5 credits.

A full-time student can take between 1.5 – 2.5 credits. This is equivalent to three, four, or five courses per semester. A student who wishes to complete their undergraduate degree in four years should aim to complete 5.0 credits in the Fall and Winter semester. You may also choose to reduce your course load, and take courses in the Summer semester. Find a balance that’s right for you.

Track your academic progress online with Degree Explorer
