- IDSA01H3 – Introduction to International Development Studies
- EESA01H3 – Introduction to Environmental Science
- MGEA01H3 – Introduction to Microeconomics
  OR MGEA02H3 - Introduction to Microeconomics: A Mathematical Approach
- MGEA05H3 – Introduction to Macroeconomics
  OR MGEA06H3 – Introduction to Macroeconomics: A Mathematical Approach

Major Program in International Development Studies

- IDSA01H3 – Introduction to International Development Studies

We advise you to consider taking courses that will fulfill requirements for your future studies in IDS. Refer to the Calendar.

Minor Program in International Development Studies

- IDSA01H3 – Introduction to International Development Studies

We advise you to consider taking courses that will fulfill requirements for your future studies in IDS. Refer to the Calendar.

Use this resource with the 2016-2017 Calendar on our website for a comprehensive understanding of your program requirements and expectations.
Elective Courses
Once you have selected courses to fulfill your first year program requirements, it’s time to think about electives to fill up your schedule. Electives are an essential part of your undergraduate studies, and are requirements for your overall University of Toronto degree.

Determine How Many Courses You Will Take in First Year
Your program requirements as a first year student will not be enough to fill your timetable. A standard course at UTSC is 0.5 credits.

A full-time student can take between 1.5 – 2.5 credits. This is equivalent to three, four, or five courses per semester. A student who wishes to complete their undergraduate degree in four years should aim to complete 5.0 credits in the Fall and Winter semester. You may also choose to reduce your course load, and take courses in the Summer semester. Find a balance that’s right for you.
