OR
- 1.0 credits of electives

Winter semester:
- STAB22H3 – Statistics I & 0.5 elective credit
OR
- 1.0 credits of electives

Determine How Many Courses You Will Take in First Year
Your program requirements as a first year student will not be enough to fill your timetable. A standard course at UTSC is 0.5 credits.

A full-time student can take between 1.5 – 2.5 credits. This is equivalent to three, four, or five courses per semester. A student who wishes to complete their undergraduate degree in four years should aim to complete 5.0 credits in the Fall and Winter semester. You may also choose to reduce your course load, and take courses in the Summer semester. Find a balance that’s right for you.
